A Quarter Century in Business

Vegetable Seed Trials

FEB 8 1932

## A QUARTER CENTURY IN BUSINESS

That means something. It means something to US and should mean a lot to our customers. Twenty-five years in business means more here than in the older sections. It covers nearly the whole history of this section as an agricultural district. It means more than just time; it means that any business to last that long must be of real service and help to the community. **ANY ONE CAN START, BUT HE MUST PROVE HIS WORTH TO STAY.**

It means long years of experience hard work hard thinking on the part of the men connected with this business that we may know how best to serve you when you need our goods. You have the benefit of our long experience when dealing with us. We not only want your business but we want to sell you goods that will serve your best interests. If our goods and service are right you will continue to come year after year—and **THAT IS WHAT HAS KEPT US IN BUSINESS FOR A QUARTER OF A CENTURY.**

### Reliable Quality Seeds

If you need seeds you want good seeds, don't you? When we say "good seeds" we don't mean just seeds that will grow, we mean seeds of good **QUALITY, PURITY and GERMINATION**, but we also mean seeds of **STRAIN and ORIGIN** adapted to your location and conditions. That's the kind of seed you need and want, isn't it? Who is in better position to supply the kind of seeds you need than the house that has studied the local conditions and requirements for years?

Our policy has always been high quality stock of a kind adapted to our locality.

### About Our Guaranty

The word guarantee is one of the most abused in the English language. It is a source of great misunderstanding and we want to make ourselves plain and frank on this point.

Every seedsman of experience well knows the impossibility of guaranteeing seeds and no seedsman of experience does guarantee them. By giving thought to the subject any reasonable man will plainly see why.

Realizing these facts, reliable seedsmen all over the land have agreed on and use the same statement on this subject which, except for firm names, is as follows:

"All seeds, plants and bulbs are subject to climatic and other conditions over which we have no control, after once being placed in the ground. Therefore, Darrow Bros. Seed & Supply Co. give no warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds, plants or bulbs, they send out and they will be in no way responsible for the crop. Every order for articles named in this catalog will be executed on these conditions only. If purchaser does not accept goods on these terms they are at once to be returned."

The above statement appears either on parcels or tags on all packages of seeds put out by us.

While we exercise great care to have all seeds we put out pure and reliable and tested for germination, and we realize that the future of our business depends on our handling only reliable seeds, we sell on the above statement only.

**DARROW BROS. SEED & SUPPLY CO.**  
Twin Falls, Idaho.

# FIELD SEEDS, GRASSES AND GRAINS

All Quotations on Grasses, Alfalfa, Clovers, Grains, Etc., are Subject to Market Changes

## ALFALFA

If you can find a better place to buy Alfalfa, Clover and Grass Seeds, that's what you want isn't it? Where could you find a better source of supply than right where they are produced in large quantities and high quality? Seems reasonable doesn't it?

Before you buy your Alfalfa, Clover and Grass Seeds, let us know your requirements and ask us to show you what we can do for you. Doesn't that sound like good business?

### Cossack Alfalfa

The New Alfalfa From Siberia

If a plant originates in one of the coldest and driest agricultural regions in the world that plant should be extremely hardy and drouth resistant — isn't that true?

That is the history of Cossack Alfalfa. Cossack is a distinct and original strain and not merely a selection from another strain.

Cossack is the hardest, the best drouth and frost resisting of any known strain of Alfalfa. It is adapted to any and all sections of the U. S.

This Alfalfa was brought to this country from Siberia a few years ago by Prof. Niels E. Hansen, an American Agricultural Explorer. Mr. Hansen was able to obtain only a small quantity of the seed, which was first planted in the high, dry regions of western South Dakota, where other strains of alfalfa had failed completely. The Cossack succeeded from the start and made a wonderful showing. Since that time it has been sown extensively over South Dakota and in many semi-arid regions and has never failed to flourish wherever it has been tried.

In the sections of Siberia where Cossack Alfalfa originated the climate is exceedingly cold and dry. It is so cold at times that ordinary thermometers will not register, but freeze up, and the annual rainfall measures only about eight inches. Yet Cossack Alfalfa has flourished there, perhaps for hundreds of years.

This strain of alfalfa has a double root system, the branch roots as well as the deep tap root, which makes it both a frost and drouth resister and is adapted to any kind of climatic or soil conditions.

Cossack is a heavier producer than other strains and on account of the fine stems and many leaves the quality of hay is superior. The crowns are very large and set low in the ground, throwing out many shoots or branches. Plants will throw out from 150 to 300 shoots. Here in Southern Idaho Cossack is proving a much heavier hay producer and of better quality than either the common or Grimm variety.

Several years ago a few of our most enterprising farmers in this section secured a quantity of pure certified Cossack seed and some of them are now producing quantities of pure, high quality seed from their plantings. We have made arrangements to handle this stock and are offering you pure, State certified Cossack. Our supplies are limited and we advise that you let us have your orders promptly, for we cannot replace our stocks on this strain.

This strain of alfalfa is so superior to others that there is no reason why other varieties should be planted except that there is not enough Cossack to supply the demand.

See price list following.

## Grimm Alfalfa

A Hardy Selection From Common Alfalfa

This strain is distinguished from the common alfalfa by its branching root system and is particularly adapted to sections where the soil has a tendency to freeze and heave. On such soils the branching roots hold to the ground better than the common alfalfa, which has a straight, deep tap root. Our observation and information leads us to believe that the Grimm variety has no advantage as to yield or drouth resisting qualities over the common variety, but there is no question that where the soil shows a tendency to freeze or heave, it does have a distinct advantage. Consequently there is a growing demand for Grimm seed in certain sections of the country. Until the available supply equals the demand, seed of the Grimm variety will remain higher in value than that of common alfalfa. Many of our customers are interested in Grimm for seed growing purposes. See Price List following, also Grass and Farm Seed List.

## Common Alfalfa

We are located in the heart of a big alfalfa seed producing section, producing the finest seed in large quantities. The seed of this section is produced at a high elevation and is as hardy as can be obtained from any source. It will show best results wherever sown.

With this great source of supply at our doors, we are in a position to select the best from the crop and with our excellent cleaning facilities and experience, we are supplying our trade a quality of Alfalfa and Clover seeds that is seldom equaled by competitors. Don't fail to get our prices and samples when in need of these seeds. We are specialists in Alfalfa and Clover Seeds. See our price list following, also Farm Seed Price List.

## CLOVERS

This crop is grown here chiefly for the seed, although it makes a wonderful hay crop. Clover is growing in popularity as a hay

Medium Red Clover

and pasture crop in some of our mountain valleys and on higher elevations. Clover is a natural cool weather crop and will often thrive in cool sections where it is too cool for alfalfa to do its best. Farmers & stockmen in the high mountain valleys will do well to keep this in mind. They can often grow big crops of Red and Alsike Clover where alfalfa will not produce to advantage. The clovers are, also very valuable to mix with other grasses for both hay and pasture.

## Medium Red or June Clover

This is the standard strain of clover grown in all sections for hay and pasture purposes and the one grown for commercial seed purposes. We always carry a special high quality, high purity strain of Red Clover seed to sow for seed production. Those sowing for seed production should use nothing but the best of seed. We can also supply you with good quality grades for hay purposes, showing slight mixtures of other clovers or alfalfa, at lower prices. When ordering always state whether you are sowing for seed production, hay or pasture purposes and we can then serve you to the best advantage. Our clover seeds are all grown in our home territory and we are therefore in a position to serve you to your great advantage.

See price list following or quantity price list in back of catalog.

## Alsike or Swedish Clover

This is one of the hardest varieties known. It does not winter kill. It will do better in moist land than any other variety of clover and is suitable for either hay or pasture. When sown with other grasses it form a thick undergrowth and greatly increases the yield. Perhaps its greatest value to this section is as a seed producer. It never fails to seed here and produces a very high yield and quality of seed. A hard clover to keep pure and free from weeds, hence it is a very important matter that you sow clean seed. Our stock of Alsike is particularly free from weeds and of high quality. Sow 6 to 7 pounds per acre. Handle in same manner as Red Clover. Write us for samples and quotations on tested seed.

We have special hay and pasture grades of Alsike that we can offer to your advantage. Always specify whether you want Alsike for seed production, hay or pasture purposes.

See price list following or quantity price list in back of catalog.

## White Dutch Clover

A low growing, close growing strain of clover used extensively for seeding lawns and to some extent for pasture purposes in mixtures. Also grown here to some extent as a cash seed crop. When asking about White Dutch Clover please specify whether wanted for lawn, pasture or seed production.

See price list following or quantity price list in back of catalog.

## Ladino or Italian White Clover

A large strain of white clover, used chiefly for pasture purposes. Valuable for irrigated lands especially on level deep soils. This clover puts out running branches, that, if not pastured too close, root to the ground and perpetuate the stand. Sow at the rate of 4 to 6 pounds per acre for pasture purposes.

See price list following or quantity price list in back of catalog.

## Sweet Clover

A wonderful pasture and fertilizer plant. For a good, quick pasture that will carry the maximum number of animals there is nothing to beat Sweet Clover. If sown straight without a nurse crop and irrigated freely it is ready to pasture in 8 to 10 weeks time and will last two seasons. Sweet Clover is a great drouth resister and can be grown to advantage on dry lands if you have sufficient moisture to germinate and start it. On dry land Sweet Clover should be sown in very early spring or late fall. On irrigated lands it can be sown most any time during spring or summer. Sow 20 to 30 pounds per acre for pasture purposes. Grows well on all soils.

## White Blossom Sweet Clover

A hardy biennial plant growing to a height of from 5 to 6 feet. Starts early in the spring and grows rapidly throughout the season. The heaviest

producing strain of sweet clover and the best to sow for fertilizing purposes.

See price list following or quantity price list in back of catalog.

## Yellow Blossom Sweet Clover

Similar to the white blossom strain except in color of bloom, but does not grow so tall and stems and leaves are finer. A wonderful pasture plant; all animals eat it freely and thrive on it. A biennial, like the white, it lasts two seasons.

See price list following or quantity price list in back of catalog.

## PASTURE GRASSES

A farm just isn't a farm without a good permanent tame grass pasture

### Orchard Grass

A valuable grass for pasture or hay, fine for mixing with alfalfa, making a high quality mixed hay. On account of its earliness it is very valuable as permanent pasture. When closely cropped it grows up again very quickly. It withstands drouth very well and is very hardy. This is a particularly

Orchard Grass

valuable grass for the west and we recommend it in every pasture mixture. Sow not less than 20 pounds to the acre. See price list following or quantity price list in back of catalog.

### Kentucky Blue Grass

One of our best pasture grasses. Is adapted to a wide range of soils and conditions. One of the earliest to start in the spring and grows well late in the fall. Kentucky Blue should be in every permanent pasture mixture. Used extensively as a lawn grass due to its close growing habits and fine color. See price list following or quantity price list in back of catalog.

A good pasture will return more money with less expense than any land on your farm.

## Meadow Fescue

Sometimes called English Blue Grass, is one of our best and most valuable pasture and hay grasses. It grows 2 feet to 30 inches tall, is very leafy, grows close and stands pasturing well. We recommend this grass in all pasture formulas.

See price list following or quantity price list in back of catalog.

## English or Perennial Rye Grass

This is one of the very finest pasture grasses, used very extensively in the British Isles. The name Rye Grass would indicate a tall, coarse grass, but the contrary is true. Perennial Rye is a low, close growing grass of very fine quality. The name comes from a resemblance of the seed head to that of Rye. We recommend Perennial Rye Grass in all formulas for irrigated lands. This is not a hay grass, but a heavy producing pasture grass.

See price list following or quantity price list in back of catalog.

## Oregon Rye Grass

This is a mixture of Perennial Rye Grass, described above, and Italian Rye Grass, which is of a very similar nature. A very good grass to sow, either straight, for permanent pasture, or in combination with other grasses.

See price list following or quantity price list in back of catalog.

## Tall Meadow Oat Grass

One of the very best grasses for all round western conditions. Tall Oat is both a hay and pasture grass and of wonderful quality for both. It is a wonderful drouth resister, fully equal to Bromus Inermus in that respect, and of much better quality. A better hay grass than Timothy and a much heavier yielder. While Tall Oat is a real drouth resister, it is equally good under irrigation. One of the finest grasses to start in the spring and will continue to flourish clear through the season until late fall. No farmer or stockman can afford to overlook Tall Meadow Oat Grass. Sow 20 pounds per acre.

See price list following or quantity price list in back of catalog.

## Slender Wheat Grass

A great dry land pasture grass, a real drouth resister. Slender wheat is the native bunch grass of the western Canadian prairies. This is a pasture grass of wonderful feeding value that should be sown freely on our western ranges. It will make good hay if not pastured, but its best value is as a pasture grass. This should prove of great value in our mountain valleys. Sow 20 lbs. per acre in very early spring or late fall.

See price list following or quantity price list in back of catalog.

## Timothy

Needs no introduction, as it has been grown in the west and all other sections as a hay and pasture grass. Not a drouth resister, but good on low, moist soils. Good to sow with clover or alfalfa.

See price list following or quantity price list in back of catalog.

## Bromus Inermus

### Brome Grass

A very hardy drouth resisting grass. Yields heavy crops and makes abundant pasture. We particularly recommend Brome Grass to be sown on high dry lands. It will withstand drouth better than any other grass we know of. We do not recommend Brome Grass to be sown on irrigated lands. Sow 20 to 25 pounds per acre broadcast. Can be sown at any time of year, but perhaps the best time is early spring.

See price list following or quantity price list in back of catalog.

## Red Top

A valuable grass for moist rich soils where it thrives to best advantage. It should be fed close; if allowed to grow up to seed cattle dislike it. On good soils grows about two feet tall. A good grass to sow in connection with other grasses. If your land is low and moist, try Red Top. Sow about 10 pounds per acre of hulled seed. We strongly recommend a mixture of Red Top and Alsike Clover for water-logged lands or low places.

# Inoculate

## ALL LEGUMES

Alfalfa, All Clovers, Soy Beans, Cow Peas, Peas  
Beans, Vetch, Peanuts with

THE ORIGINAL LEGUME INOCULATOR  
Guaranteed Fresh Each Year Leads in High  
Germ Count

For profitable results, Agricultural Colleges advise inoculation for all legume seed, because it pays well in producing larger quality yields. Fresh, high count NITRAGIN, containing billions of efficient nitrogen-gathering germs, builds up the soil.

All Legume Germs are PERISHABLE. To Protect You, NITRAGIN Cans are Stamped With Expiration Date. Insist on NITRAGIN.

### Mixing Nitragin with Seed

Legume germs die rapidly when dried. NITRAGIN, containing

between 30% — 40% moisture, will readily stick to the seed without adding water, and give inoculation. However, for best results, the preferred practice, recommended by The Nitragin Company and Agricultural Authorities is to use water when mixing legume culture with seed.

## NITRAGIN PRICES

IMPORTANT: When ordering NITRAGIN, always be sure to state kind of legume seed you wish to inoculate.

Nitragin Has Served the American Farmer Since 1898

## PASTURE MIXTURES AND FORMULAS

If you could find a way to make a pasture that would carry more animals per acre than you have ever carried before, what would you say? That is what you want in a pasture, isn't it? We offer you the results of our years of experience in the study of grasses and best methods of sowing and handling pastures.

Western farmers must carry more livestock if they are going to succeed. No man can successfully carry livestock profitably without good pastures. The first move is to provide for pasture and feed. You need a permanent pasture and no pasture is permanent except a perennial grass pasture.

We recommend the following formula as the best all round mixture for irrigated lands:

### Leslie's Pasture Formula

- 2 lbs. Kentucky Blue Grass.
- 6 lbs. Meadow Fescue.
- 4 lbs. Tall Meadow Oat Grass.
- 4 lbs. Orchard Grass.
- 4 lbs. Perennial Rye Grass.
- 5 lbs. Sweet Clover, either White or Yellow.
- 
- 25 lbs. per acre.

This formula has stood the test of years. Most of the good pastures in this section, and there are none finer anywhere, are from this formula. We put up each variety separately so you will know just what you are sowing.

Sow enough seed when you make a pasture. Don't use two acres of land to carry animals that one acre should carry. You want a thick, heavy pasture, don't you? Thin sowing will never give you a thick stand of grass nor carry the animals your land should carry. It takes at least 25 pounds per acre of the grasses to make a good pasture. See sowing instructions following.

### Quick Action Formula

If you need and want a quick, temporary pasture there is nothing better than the following:

- 20 lbs. Sweet Clover, either white or yellow
- 10 lbs. Perennial Rye Grass.
- 
- 30 lbs. per acre.

If sown early in the spring, without a nurse crop and watered freely, this formula should make a heavy pasture in 8 to 10 weeks.

See sowing instructions for grasses and clovers following.

### Western Hog Pasture Formula

If you keep hogs you need a good hog pasture separate from other livestock. The following will give you maximum results and quick action:

- 10 lbs. Red Clover.
- 10 lbs. Alfalfa.
- 5 lbs. Meadow Fescue.
- 
- 25 lbs. per acre.

If sown in early spring straight without nurse crop and watered freely this formula should be ready to pasture within two months.

See sowing instructions for grasses and clovers following.

### Short Moisture Pasture Formula

In locations where rainfall or sub-moisture is depended on, it is important to use just the right kind of grasses best adapted to such conditions. There are many such locations that will produce pasture and hay profitably. We strongly recommend the following mixture for such locations:

- 7½ lbs. Tall Meadow Oat Grass.
- 7½ lbs. Slender Wheat Grass.
- 2 lbs. Kentucky Blue Grass.
- 5 lbs. Sweet Clover, either White or Yellow.

Sow 22 pounds per acre as above. This mixture can be sown on the snow in early spring or in the

fall just before the rainy season sets in; any time that you have plenty of moisture to start it. Sow broadcast on a well-settled seed bed. We strongly recommend this formula for irrigated districts where water supply is not dependable.

See sowing instructions for grasses and clovers following.

### Lawn Grass Mixture

If you want to improve the appearance of your place a fine, thick, velvety lawn will help more for the money spent than most anything you could do. You need and want a good lawn and why shouldn't you have it?

### Darrow's Lawn Mixture For Country Homes

This is a high quality mixture made up of the best of pure seed and compounded in a way to give you a fine thick velvety lawn in the quickest possible time. Our sowing instructions for Grasses and Clovers following will apply on country lawns. Prices—1 lb. 60c; 5 lbs., \$2.50; 10 lbs., \$4.00. Postage paid to second zone.

## Sowing Instructions for Grasses and Clovers

### Pasture Grasses on Irrigated Lands

The world progresses by finding ways to do things better. If you can find a way to make better pasture, that's what you want, isn't it?

Our tests and experience lead us to believe that the following instructions will bring best results:

FIRST: Sow all pasture grasses straight, not with a grain nurse crop; grain smothers the delicate young grass plants, making a thin pasture or failure to get a stand at all.

SECOND: Always sow on a well-settled seed bed. If land has been recently plowed it should be worked down firm before sowing. Grass seed will never catch well on a loose, ashy seed bed. Old clover, alfalfa, beet or bean fields make good seed beds for pasture grasses. Do not plow or disc such land; smooth it out with a spike tooth harrow and firm it with a good packing tool; then sow your seed.

THIRD: Sow all grass seeds shallow. This is natural for grasses; just broadcast seed on top of ground and harrow or brush in lightly. Grass seed will not germinate if sown too deep.

FOURTH: Soon as grass is sown, corrugate and irrigate thoroughly; then in four to six days irrigate lightly and continue with light waterings every four to six days for the first four weeks, after which a good irrigation every ten days or two weeks apart should be sufficient. Grass and clover seeds require plenty of moisture when first sown to insure a good stand.

FIFTH: Do not turn stock on pasture when grass is first starting. If turned on when grass is young, animals will pull it up, roots and all, ruining the stand. A new pasture should not be turned onto until roots are thoroughly set. It takes about 90 days after grass starts to grow for the roots to become thoroughly set. Do not turn on the stock until about 90 days after grass starts to grow.

Read our recommendations for a grass pasture for irrigated lands on page 4 of this catalog.

### Sowing on Dry Lands

If we are to get results sowing grasses on dry or non-irrigated lands we must take the natural climatic conditions into consideration and use them intelligently. We can all agree on that.

First, we must use drought resisting strains of grasses, for we are apt to be short of moisture a great part of the season. Slender Wheat, Tall Meadow Oat and Bromus Inermis are all good drought resistors and high quality hay and pasture grasses. (Read our description of these.) Yellow Blossom Sweet Clover has good drought resisting

qualities and we should use it in dry land pasture mixtures. See our Short Moisture Pasture Formula. We would add a little Kentucky Blue Grass to all dry land seedings. This grass is very hardy and persistent. It may dry down in the hot summer months but always comes back and makes good feed in early spring and late fall. This covers the selection of varieties.

**SECOND:** We know that all grass seeds will need plenty of moisture to germinate and that we have that moisture in the early spring and late fall. That must govern our time of sowing—early spring or late fall is the time we must sow. A good practice is to sow on the snow in early spring and let seed settle into the soil as the snow melts and we have all of the spring moisture for germination.

**THIRD:** We need a settled seed bed for grass seed and should sow as shallow as possible. In most cases it will not be necessary to disturb the soil much, if any, and in case of reseeded old grass land, not at all except that the field should be harrowed or brushed to work the seed into the soil after sowing. When sowing on the snow harrowing will not be necessary.

Any grass seeding should have plenty of time to get set and growing before animals are turned on, this will take about ninety days after it starts to grow. If pastured before the roots are firmly set the stand will be ruined.

You can greatly increase the animal carrying capacity of old pastures by reseeding. Every stockman can use more and better pasture.

## GENERAL FIELD SEEDS

Our Re-cleaned and Graded Seed Grains mean higher yields—you need and want higher yields.

### WHEAT

#### Dicklow Wheat

The Most Popular Wheat in Idaho

That Dicklow is a wonderful variety of wheat is beyond question. Its yielding qualities are wonderful; we doubt whether there is a heavier yielding wheat than Dicklow in existence. In quality Dicklow is a very soft wheat and it will not grade as high as many other kinds, but it makes up for this in yielding qualities. Dicklow has immense square heads always well-filled with large plump berries. When allowed to stand after ripe this variety is inclined to shatter quite badly and is therefore not a good dry-land wheat.

We have a very fine quality of re-cleaned Dicklow this season.

See price list following, also quantity list in back of catalog.

#### Federation Wheat

A new strain of wheat that is gaining in popularity very rapidly in this section. The grain is very heavy and plump; it belongs to the White Spring class, berries resembling the Dicklow. This wheat is distinguished by a very stiff, short straw with very scant foliage that is practically proof against lodging; also by its red chaff, a peculiar combination with the white berry. Federation is proving itself a remarkable yielder, seems to equal the popular Dicklow strain in that respect. Our stock of Federation is limited this season. Order early.

See price list following, also quantity list in back of catalog.

Swedish Select Oats

### OATS

#### Re-Generated Swedish Select

This popular old strain of oats has been grown in the best agricultural sections for many years; it remains one of our most popular varieties and we doubt whether a better strain has ever been developed. Swedish select was originally imported from Sweden, a country that has given to the world some of the finest strain of oats.

Swedish Select is a medium early strain; straw medium height, very stiff and stands up well; seldom lodges. The grain is rather short, but very plump; the hull is very thin, consequently weighs very heavy. We do not think that any strain of oats yet developed will out-weigh Swedish Select. The heads are large and under all conditions Swedish Select yields as heavy on the average as any variety known.

Our Swedish Select is grown from pure strain stock shipped in from one of the best seed oats growers in the East. Our stocks are limited, order early.

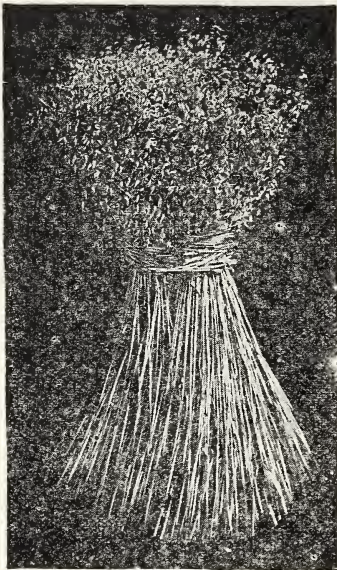

See price list following, also quantity list in back of catalog.

#### Iowa Oats

Very Early

The Iowa is a development of the Iowa Experiment Station and has proven very popular in the Central West. We have grown Iowa in Idaho for

Our 10c packages are larger. You get more for your money than on lower priced packages. That's what you want.

Iowar Oats

years and it has proven very popular here. If you want a quick growing early strain Iowar will meet the requirement.

The Iowar is a very heavy yielder, straw medium height. The heads are of pinnacle type and very large. The grain is white, medium sized, very thin hulled and plump; a very heavy oat.

The Iowar is a very early oat and has proven a good oat to sow with barley for a mixed grain, and a good strain for the high elevations in the west.

See price list following, also quantity list in back of catalog.

## BARLEY

### White Hulless or Bald Barley

If you want a very early high quality feed grain there is nothing to compare with Hulless Barley. No grain we produce here compares with it in feeding value for the finishing of livestock; it will take the place of corn for that purpose. Hulless Barley is the heaviest grain known; weighs about 70 pounds per measured bushel when well matured. It threshes out absolutely free of hull, resembling wheat when threshed. It is free of beards and handles as easily as wheat. We have known it to yield over 30 bushels to the acre on dry land and as high as 80 bushels under irrigation. Must be sown as early as possible in the spring to get the best yield. It is a very quick-growing, short-season grain, and there is never any trouble maturing it anywhere in this section. It does not yield nearly as well if sown late. Sow at the rate of 150 pounds per acre on irrigated land, lighter on dry land.

Due to the fact that Hulless Barley has no beards it is a splendid grain for hogging down. There is nothing better for finishing early hogs. It will be ripe in July in this section.

Our stocks are very limited this season and hard to obtain. Order early.

See price list following, also quantity list in back of catalog.

### Trebi Barley

The best of all bearded barleys, heaviest producer, thinnest hulled strain known. We think that there is no strain of bearded barley equal to

Trebi and strongly recommend it to our customers.

See price list following, also quantity list in back of catalog.

## RYE

### Spring Rye

Spring Rye makes an excellent crop to sow for quick pasture. We strongly recommend it for that purpose. It is also a good yielder and the grain makes a good stock feed. On dry farms, where it is necessary to sow annual pasture, this grain is very valuable. Sow 80 to 90 pounds per acre as early in the spring as weather will permit.

See price list following, also quantity list in back of catalog.

### Fall Rye

If you need quick pasture Fall Rye has great advantages. If sown in early spring it will soon give an abundance of quality feed. For pasture purposes this Fall Rye is superior, as it stools heavily without shooting seed stalks; will furnish good pasture clear through the growing season. For pasture purposes sow 100 pounds per acre.

See price list following, also quantity list in back of catalog.

If your land will return more money in Grass and Hay with less expense that's what you need isn't it?

Hulless Barley

Canadian Field Peas

## FIELD PEAS

Every farmer and stockman should be interested in Field Peas. Next to corn peas have a higher feeding value than any other grain for finishing purposes.

All over the intermountain section Field Peas are growing in popularity with the stockgrowers. There is nothing equal in finishing off early hogs, sheep or lambs, as the crop is ready for harvest about the middle of July. They are fine for hogging off. Hogs can be turned in when the peas are in hard dough and will be ready for market at a time of year when few hogs are on the market.

The crop is not expensive to grow, as it is sown just like wheat or other grains; requires no cultivation and when hopped off there is no harvesting or threshing expense.

Peas can be sown either straight or in combination with other grains, like wheat, hullless barley, etc., but be sure to use more peas than other grain in sowing. If the grain predominates it will reduce the yield of peas. This crop should be sown just as early as the ground is ready to work (spring frost will not injure Field Peas.) If wanted for winter feed Field Peas can be harvested and threshed like grain or can be stacked and fed in the straw. The vines make excellent hay or roughage and the hay yield is heavy.

Sow at the rate of 120 pounds per acre straight; if with grain use at least 80 pounds peas per acre and 40 or 50 pounds grain.

See price list following, also quantity list in back of catalog.

## CORN

Idaho has demonstrated that she is as good or a better corn state than most of the famous Corn Belt, and it is proving one of our most profitable crops. No trouble growing corn here if you plant acclimated seed. The wise farmer will plant more corn and feed more livestock. If you can grow corn for less expense than any other crop and average better returns per acre, that's what you want, isn't it?

### Idaho Golden Dent

This strain is very popular in this section; it just can not be beaten in a yellow corn for Idaho conditions. We developed Idaho Golden Dent from Wisconsin Golden Glow. It is thoroughly acclimated to our conditions. Idaho Golden Dent is a 90 day strain, with ears 9 to 10 inches long, well filled out over the tip, running very even and uniform. Color bright golden yellow, red cob, deep kernels. Stalks grow tall and leafy. Golden Dent makes a good, rich silage corn when planted for that purpose.

Will yield with any of the yellow dent strains and matures ahead of most of them.

See price list following or quantity list in back of catalog.

### Idaho Silver Dent

A wonderful corn for Idaho conditions and a great favorite with many of our customers. Idaho Silver Dent was developed by us from the famous Wisconsin Silver King. It is thoroughly acclimated to Idaho conditions and safe to plant in most of the state except in the very high altitudes. We find the Idaho Silver Dent fully 10 days earlier than most of the yellow dent corns. It appears to mature about as early as the Flint strains.

**DESCRIPTION:** A white dent with ears about 8 to 10 inches long, deep kernels set evenly on the cob and well filled out over the tip of ears. One of the heaviest yielding strains. Some of the best yields made here have been with this variety. Stalks are rather short; will not produce as much fodder as some of the yellow corns, but will out-yield most of them in grain.

See price list following or quantity list in back of catalog.

### Cassia County Flint

This is a large-eared strain of the Australian White Flint variety that has been grown in this section for a considerable number of years, becoming perfectly acclimated. A very heavy yielder, very early and hardy, it never fails to mature. There are very few localities in Idaho where Cassia County Flint will not mature and make a big crop of corn. If you want a safe corn in most any locality, plant this variety. Requires 8 to 10 pounds per acre.

See price list following or quantity list in back of catalog.

For larger quantities see Grass and Field Seed Price List on page 45.

## VETCH

There is nothing better than Vetch as a soil builder

If you could find a hay and pasture plant equal to alfalfa in feeding value, a heavier producer and one that would make a world of pasture, or two good cuttings of hay the first year from sowing—what would you say? It would be a very valuable plant and worth trying, wouldn't it? That is just what Vetch will do for you, and you cannot afford not to try it if you need quick pasture or hay.

The Vetches belong to the pea family; are very hardy, will grow on all kinds of soils and flourish under almost any condition. They will do well in our coldest sections and will make a wonderful crop for our high mountain valleys. Vetch will stand a lot of drouth.

## Sand or Winter Vetch

This variety can be sown either in spring or fall. If sown in the spring it should go in as early as possible in order to get the most from it. Vines grow from 6 to 8 feet long and the crop needs a light mixture of grain to hold it up off the ground. Sow broadcast, same as grain, using 25 to 30 pounds per acre with 25 to 30 pounds of grain.

Corn growers should sow Winter Vetch in fields when corn is laid by for fall, winter and spring pasture. Inoculate Vetch with Nitragin for best results.

See price list following or quantity list in back of catalog.

Field Peas will take the place of corn in high altitudes.

## Spring Vetch

If you want a quick, high quality first year hay crop here is one that is a winner. Grows about 3 to 4 feet tall and makes its growth very quickly. If sown early should make two good cuttings of a mighty lot of pasture. Stockmen cannot afford to overlook Spring Vetch. Sow 60 to 80 pounds per acre, same as grain. Use 40 pounds of grain with it. Inoculate Vetch with Nitragin for best results.

See price list following or quantity list in back of catalog.

## PRICES—SMALL QUANTITIES

## Vetch

	1 lb.	5 lbs.	10 lbs.
Sand or Winter Vetch.....	.30	\$1.25	\$1.80
Spring Vetch.....	.25	.85	1.25

For larger quantities see Grass and Field Seed Price List on page 45.

## RAPE

If you need a good summer and late fall pasture there is no reason why you shouldn't have it. for Dwarf Essex Rape will produce it at a very small cost. If sown in early spring it is ready to pasture in a very short time and will last all summer. You can sow Rape on grain fields immediately after harvest for fall field. Fine to sow in corn fields when you are through cultivating for late fall pasture.

Why not make double use of your fields with Rape? If you don't need the pasture sell it to the stockmen and make an extra income.

Dwarf Essex Rape should be sown 10 pounds to the acre, broadcast and worked into the soil lightly.

See price list following or quantity list in back of catalog.

## FETERITA

A good grain feed crop grown extensively in some sections of the country for poultry and hog feed. Feterita will make good with very little moisture.

See price list following.

## KAFFIR CORN

Similar to Feterita and used for the same purpose. Some prefer the Kaffir Corn, claiming it has a higher feeding value. Like Feterita, Kaffir Corn will make good with very little moisture.  
See price list following.

## SUGAR CANE or SORGHUM

If ever you need a lot of good hay Sorghum will get you where you want to be and do it at a very reasonable cost. We doubt if any other feed crop will produce greater tonnage or better quality feed. We have known Sorghum to produce 15 tons of dry fodder per acre in this section. Sow not less than 150 pounds per acre, broadcast, same as grain, at any time after danger of frost is past, up to June 15th. Harvest when first heads are turning brown.

See price list following or quantity list in back of catalog.

## SUDAN GRASS

Why should any farmer ever be short of hay when there is such a plant as Sudan that can be sown as soon as danger of frost is past and produce two heavy crops of the finest hay in one season? Also you can sow Sudan up to August 1st and make one heavy crop. Keep Sudan in mind and when a hay shortage threatens head it off.

Sudan Grass is a natural drouth resisting plant originating in the deserts of Africa. It will make a good crop with very little moisture and should be extensively used in our short water districts. Under irrigation Sudan flourishes and makes a still heavier crop.

Sudan should be sown broadcast, same as grain, at the rate of 40 pounds per acre or more. It will make the finest first cutting in about 50 days from sowing. Should be cut when the first seed heads begin to turn, and will make 4 to 6 tons of fine hay per acre in a season. This grass is an annual to be sown each year. If wanted for quick pasture sow Sudan 60 to 80 pounds per acre soon as danger of frost is past and in a few weeks time it will be ready to carry a lot of livestock. All animals like Sudan hay or pasture.

See price list following or quantity list in back of catalog.

## MILLET

### Golden Millet

An annual quick hay or forage crop of great value. Where hay or feed is needed the first season from sowing there is nothing better than Golden Millet. In this section it will yield four to five tons of the very finest hay per acre. Can be sown as late as July or the fore part of August and will mature a crop of hay or seed in 60 to 70 days from sowing. Used very extensively in most parts of the

country as a catch crop where other crops have failed. Sow 30 pounds of seed per acre broadcast. Write for prices.

## Hog or Broom Corn Millet

If you find yourself where you need the quickest grain crop known Hog or Broom Corn Millet will help you through. This crop will mature in about 70 days from sowing and give you grain of very high feeding value. Broom Corn Millet is a wonderful crop for our short season sections and furnish a fine grain feed for livestock. Particularly valuable for finishing hogs and for poultry, or, if ground fine, makes good dairy feed.

Broom Corn Millet is sown and handled just like any other grain crop. Sow 50 pounds per acre any time after danger of frost is past, up to August 1st.

See price list following or quantity list in back of catalog.

## FLAX

This crop is looking very promising as a good standard quick cash crop for this section. If you need such a crop we can assure you that this appears to be a real Flax country. It has been demonstrated by growing small acreages that we have the best of conditions for Flax and that it yields here away above the average.

Sow any time from March up to July 1st, same as other grains, using at least 50 pounds of seed per acre on good land.

## Reserve Flax

### Wilt Resistant

Reserve is one of the highest yielding, wilt resisting strains of Flax. There are other good strains but you can hardly improve on Reserve. We offer you fine, re-cleaned and graded seed Flax.

See price list following or quantity list in back of catalog.

## Truck Delivery Everywhere

On heavy goods it is often more convenient and quicker to ship by truck, no more expensive and often less. Truck lines now go almost everywhere, even into the most remote places. When ordering goods priced f. o. b. Twin Falls advise us whether you have regular Truck Service and whether you want your order to come that way. You will often find it to your advantage.

## GARDEN SEEDS

### Darrow's Garden Seeds Will Bring the Best of Results

Western seedsmen know best what is adapted to western conditions and your local seed houses know best what is adapted to local conditions. Our seeds are adapted to our conditions. For years the finest gardens in this section have been grown from our seeds.

Our Garden Seeds are backed by a quarter century's experience in handling seeds in this section.

### ASPARAGUS SEED

When an Asparagus bed is started from seed the seed should be sown in the open ground in early spring and plants transplanted to the permanent bed when one year old. One ounce of seed will sow 50 feet of row. Asparagus grows to perfection in Idaho.

#### Mary Washington

A rust resistant strain developed by the experts of the United States Department of Agriculture. Is a heavy producer of large, rich green colored stalks, with a trifle purple tint at the tips. Of excellent quality and very early.

Prices: Pkt., 10c; oz., 30c; ¼ lb., 50c.

#### Palmeto—Asparagus

The most popular asparagus on the market; a good yielder, green in color and of fine quality.

Prices: Pkt., 10c; oz., 20c; ¼ lb., 40c

### ASPARAGUS ROOTS

You would like to have a fine Asparagus bed to supply all the fine tender tips you want in early spring, wouldn't you? Why shouldn't you have it? Put out a bed this year when you can get the plants at bargain prices.

Mary Washington Asparagus Roots by mail, postage paid: Doz., 30c; 50 for 80c; 100 for \$1.50.

Write us for prices on larger quantities.

### GARDEN BEANS

Culture: About May first, or as soon as danger of frost is past and ground is warm. Plant in drills 18 inches to two feet apart and cover lightly. Cultivate well to keep down weeds. Sow about every two weeks during spring for succession.

#### Giant Stringless Green Pod

A very productive large round podded sort, maturing a little later than Burpee's Stringless. See price list following.

#### Burpee's Stringless

The finest green pod stringless bean. Earliest and hardest of all green sorts. Produces large, handsome pods. Perfectly stringless. A very heavy yielder. Pods fleshy and of very fine flavor.

#### Prolific Black Wax

The earliest of the wax beans. Vines medium sized, vigorous and hardy, pods round and fleshy. Remains for some time in condition for use. A splendid bean and a favorite with our trade. Very tender. See price list following.

#### Pencil Pod Black Wax

One of the finest garden beans on the market. As near stringless as a bean can be and of exceptionally fine quality. Very long, fleshy yellow pods. Pods sometimes measure 8 to 9 inches in length. Yields equal to any garden bean that we have ever seen. A great bean to use for canning for winter use. We strongly recommend Pencil Pod Black Wax. See price list following.

#### Improved Golden Wax

A splendid improvement over the popular Golden Wax. Pods are very uniform and of a golden yellow, about four to five inches long and rather flat. Pods are meaty, tender and stringless. See price list following.

#### Wardwell's Kidney Wax

The strong vines yield abundantly. Long, nearly straight, broad, creamy white pods. They are of very fine quality and a fine variety for market gardeners. Matures just a little later than Golden Wax. We strongly recommend this bean. See price list following.

### DWARF OR BUSH LIMA BEANS

#### Burpee's Bush Lima

Plants grow 18 to 20 inches high, of stout, erect growth; pods large and well filled with large, even-sized beans; a heavy yielder. This Lima is fully equal to the pole sort, of similar size and much more convenient to handle.

#### Henderson's Bush Lima

Grows erect 18 to 20 inches tall; requires no support; very early and productive. Beans have the true Lima flavor, buttery and tender. Matures at least two weeks earlier than the Pole Limas. This is an exceptionally good bean for this section.

### POLE BEANS

#### Kentucky Wonder or Old Homestead

Vines vigorous, climbing well; very productive; pods green, very long, often reaching 9 to 10 inches.

very crisp and tender. This is a great favorite as a snap bean.

### Lazy Wife

One of the most productive and easily gathered of the pole beans. Very fine flavor, a fine green snap bean and equally good as a dry shelled bean for winter use. Pods very long, practically stringless and tender.

## GARDEN BEETS

Sow in early spring up to July 15th. Keep them coming on fresh and tender.

### Early Egyptian

An old favorite early variety. Dark red in color, round type. One of the earliest and of excellent quality. See price list following.

### Extra Early Eclipse

An extra early strain of great merit. Good bright red color, globular in shape. An excellent early beet. See price list following.

### Edmand's Blood Turnip Beet

An old standard general crop beet. In quality one of the finest. As the name indicates, a true round or turnip shape. Popular with market gardeners. See price list following.

### Detroit Dark Red

One of the finest general crop garden beets known. Quality the finest, color very dark red, size medium and very uniform. We strongly recommend Detroit Red. See price list following.

### Swiss Chard Beet

A beet producing leaves only, of a quality far surpassing the leaves of any ordinary beet for greens. Very tender and crisp. It is considered by many as far superior to Spinach for greens. The leaf stems are used the same as asparagus and are excellent. Cultivate same as ordinary beets or spinach. If you like greens, try Swiss Chard.

### Stock Beets or Mangels

These large, heavy yielding Stock Beets produce an enormous amount of succulent feed for winter use. All stockmen need this kind of feed. Plant early spring up to June 1st in same way you would handle garden or sugar beets.

### Danish Sludstrup

This new mangel has attained the highest honor in agricultural circles in Denmark where mangels are as important a crop as corn or grain in this country. Sludstrup has a long, reddish-yellow root, growing more than half above the ground and is easily harvested. It excels any other variety in weight and yield; has a very high feeding value. Our seed is from one of the most reliable Danish growers. See price list following.

## Giant Long Red

This is perhaps the heaviest cropping and largest of all Mangels. The roots grow from one-half to two-thirds above the surface and are frequently two or more feet in length by six to eight inches in diameter. Has a good feeding value—one of our very best sellers. See price list following.

## Golden Tankard

A splendid variety and a great favorite with many growers on account of its manner of growth and ease of handling. Yellow in color, as the name indicates; stump rooted, standing well above the ground it is very easy to pull. Has a high feeding value and is one of the best mangels for feeding dairy cows. See price list following.

## Giant Rose Half Sugar

Combines the large size and heavy yielding qualities of the mangel with the high feeding qualities of the sugar beet. Grows well out of the ground and is easily harvested; one of the best for fattening on account of its high sugar content. Red in color, flesh very white. See price list following.

### Prices—Garden Beets

Plant Mangels 12 to 15 pounds to the acre.

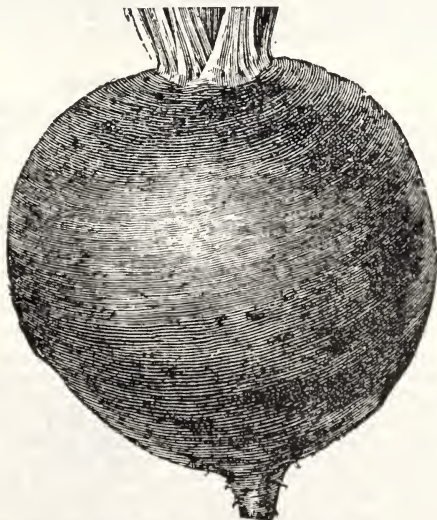

## BORECOLE OR KALE

Greens for early fall, winter and spring. Can be sown any time from spring to August. Immense quantities of Kale are grown in the South for greens. Makes fine green feed for poultry.

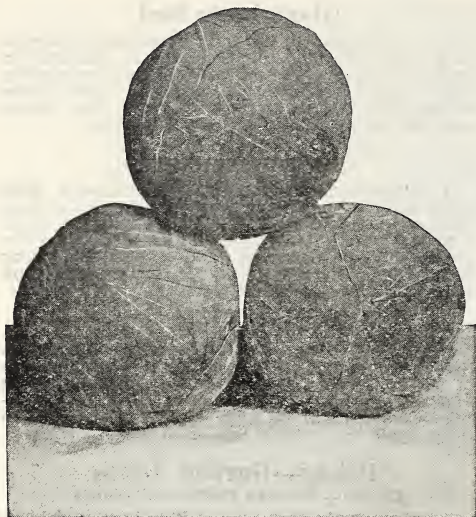

### Dwarf Green Curled Kale

Hardier than cabbage; will stay green until away in the winter. Leaves curley as parsley, tender and fine flavor.

Pkt., 10c; Oz., 15c; ¼-lb., 50c.

Edmand's Blood Turnip Beet

Danish Ball Head Cabbage

## BRUSSELLS SPROUTS

Brussels Sprouts are miniature cabbage formed on a plant stalk. The flavor is very delicate. Culture same as cabbage. Sow same time as cabbage and transplant. For winter use sow in May or June. Brussels Sprouts are growing in popularity of late years.

### Dwarf Improved Brussels Sprouts

A variety producing compact sprouts of excellent quality. One ounce of seed will sow about 200 feet of drill. Excellent for greens.

Pkt., 10c; Oz., 25c.

## CABBAGE

Our cabbage seed is all of the finest imported stock. Methods of growing cabbage are so generally understood that explanation is unnecessary. The most important point to bear in mind is to have the soil as rich as possible. You will never get it too rich.

### Early Jersey Wakefield

An old standard extra early variety. Pointed heads of extreme hardness. Earliness and hard heading are the outstanding features of this excellent variety. See price list following.

### Golden Acre

A popular new cabbage of the Copenhagen Market type, smaller and a trifle earlier than that famous variety. Round, very hard heads and very uniform in type. See price list following.

### Copenhagen Market EARLY

The earliest of the larger heading strains. Developed by one of the leading cabbage growers of Denmark and very rapidly became one of the leading early cabbages in all cabbage growing sections. Copenhagen Market produces a large, solid round head almost as quickly as the pointed strains. A wonderful cabbage, both for home use and for market gardeners. Copenhagen Market is a good keeper and if put out late makes a fine winter cabbage. We always carry the best of imported stock—the kind that will give you satisfaction. See price list following.

## Surehead

A favorite old standard winter sort. One of the surest headers of all varieties. It has been popular for years and still retains its popularity. Heads solid and firm and a splendid keeper. See price list following.

## Danish Ball Head

The best late cabbage yet introduced. Heads hard and solid, fine grained and tender. Heads round, medium sized, but very heavy and solid. A great favorite in all markets. If you are raising cabbage for market we strongly recommend Danish Ball Head. Our seed of this variety is the finest imported strain. See price list following.

## Premium Late Flat Dutch

This variety of late cabbage is a standard well-known sort in all sections and is a general favorite for winter use. Flat Dutch has retained its well-deserved popularity for years. Large, solid, flat heads and a good keeper. Ours is the best of selected seed. See price list following.

## RED CABBAGE

### Mammoth Rock Red

A hard-heading variety. Heads are as large as Premium Flat Dutch. Deep red to center, and is highly recommended. See price list following.

### OUR CABBAGE SEED IS ALL BEST IMPORTED DANISH GROWN STOCK

## CARROTS

Sow as early in spring as ground is in good shape for cultivation. It has been found that in this section it is best to sow early while the natural moisture is in the ground. If impossible to sow early, ground should be irrigated before the seed is planted. The carrot is a difficult plant to get started and if ground is allowed to crust over them they will not grow. Sow very shallow, about two or three pounds per acre.

### Early Scarlet Horn

Excellent for early planting for garden use. Grow just the right size, tops small, quality very fine, color rich orange. See price list following.

### Danver's Half Long

A very popular strain of carrot universally planted for garden purposes. Medium length, tapering to a blunt point. A heavy yielder and of fine quality. See price list following.

### Chantenay or Model

This excellent variety is similar to Danver's Half Long and about two weeks earlier. Somewhat shorter than Danvers and more blunt at the point. It is very smooth and uniform in type, of a deep orange color and very fine quality. Good for winter use as well as early carrot. See price list following.

### Ox Heart or Guerande

A very rapid growing variety. Type short and thick, runs very uniform as to type and size. Many people prefer Ox Heart on account of its being so easy to dig. Quality fine and tender. See price list following.

### Improved Long Orange

An old well known sort of very fine quality. Type heavy near crown, tapering uniformly to a point. Color deep orange. A splendid keeper for winter use. Extensively grown for stock feeding as well as for table use. See price list following.

## STOCK OR FIELD CARROTS

If you could find a root crop that is easy to grow and produce more good succulent feed per acre than anything else you could plant it would be a big help and money maker, wouldn't it?

That is just what a good field of carrots will do and you cannot afford not to have one.

Stock Carrots will easily produce 30 to 40 tons per acre in this section. Do you know anything else that will do that? Sow just the same as garden carrots and handle in same way. You can put them in any time from very early spring up to June 15th, but we prefer the early sowing.

### Long Orange Belgian

A very high quality yellow stock carrot. Grows about half way out of the ground. For those who prefer a yellow strain there is nothing better than Orange Belgian, and none that will make a heavier yield. An excellent keeper. See price list following.

### White Mastodon

A remarkable producer and a carrot that is easy to handle on account of its type. Mastodon is a short, thick carrot, tapering to a point. Feeding quality is very high, very sweet and crisp and a good keeper. See price list following.

OUR CARROT SEED IS THE BEST OF IMPORTED STOCK

## CAULIFLOWER

Culture: Cauliflower is handled in the same way as cabbage. Needs plenty of moisture. We have never known any place where cauliflower thrives better than Southern Idaho, nor have we ever known finer quality. We look to see cauliflower grown here as a great market crop and it could not fail to pay well.

### Earliest Dwarf Erfurt

This is a first class cauliflower, very early. One of the best and surest to head. A fine old standard sort. Our seed is the best Danish stock. See price list following.

### Early Express Snowball

An improvement on the Early Danish Snowball equal to that famous cauliflower in type and quality but still earlier. See price list following.

### Danish Dry Weather

This is a great general crop Cauliflower developed to stand hot and dry weather and make a crop under all conditions.

Somewhat larger head than the Express Snowball and Snow White, good keeper. Danish Dry Weather is a good Cauliflower for main crop. See price list following.

Sweet Corn—Stowell's Evergreen

## CELERY

We have never seen finer looking or better flavored celery than is produced in the Twin Falls country. Some of our customers are now producing it quite extensively for market and it is proving a highly profitable crop. We predict that in a few years this will be a great celery producing district. Our soil and irrigation are singularly adapted to celery growing.

### Golden Self Blanching

The best of all early self-blanching varieties. It is ready for use very early in the season; blanches easily. Dwarf, compact habit of growth, thick heavily ribbed stalks which blanch a waxy yellow. Flavor very fine. Imported stock. See price list following.

### White Plume

This is the earliest and most easily blanched, but does not keep well after being taken from the trenches. The plants grow rapidly and blanch early during the summer months.. Good as an early market sort. See price list following.

White Plume Celery

### Giant Pascal

The stalks are very large, crisp and of fine quality. Blanches very easily and quickly. The heart is golden yellow and has a very attractive appearance. For fall and winter use it's hard to beat Giant Pascal. Developed from Golden Self Blanching and possesses many of the qualities of that fine strain with added keeping qualities. Good for main crop. See price list following.

If you want Select Onion Seed that will produce a big yield of Quality Onions buy from Darrow Bros. Seed & Supply Co.

## SWEET CORN

If you want the finest of Sweet Corn from about August first into October plant our Early Golden Market or Golden Bantam, Bantam Evergreen or Howling Mob and Stowell's Evergreen, or by planting successive plantings of Early Golden Market or Golden Bantam. We advise the planting of both a yellow and a white sweet corn for variety's sake.

### Early Golden Market

An extra early strain of the type of the famous old Golden Bantam, but ten days to two weeks earlier. Good sized ear of nice type, fine golden color. Quality of fully equal to Golden Bantam. Early Golden Market is a fine corn for market gardeners as well as for home gardens. See price list following.

### Golden Bantam

A very early sweet corn with golden yellow grain, very tender and of excellent quality. Ears are about six to seven inches long, of the medium size most suitable to table use. The flavor is exceptionally rich and delicious.. Our stock is carefully selected. See price list following.

### Bantam Evergreen

A cross between Stowell's Evergreen and Golden Bantam, retaining the fine qualities of both those famous sweet corns. Fine large ear, covered with light yellow and deep set kernels. Quality excellent. A splendid market strain. Try Bantam Evergreen. See price list following.

### Howling Mob

This is a new sweet corn Extra Early. Has the advantage of producing large ears like the later varieties and at the same time is extremely early. Ears seven to nine inches long with 12 to 14 rows of pearly white grains. Quality very fine. A very fine corn for market gardeners as well as for home use. See price list following.

### Early Evergreen

Slightly smaller ears than Stowell's Evergreen, but fit for table several days earlier. Ears seven to eight inches long, with 16 to 20 rows of very deep grain of the finest possible quality. A standard main crop variety. Remains in good condition for table use a very long time. See price list following.

### Stowell's Evergreen

This is a favorite standard main crop variety. Ears are very large and handsome with very deep even kernels, An exceptionally sweet high quality corn. A late variety but matures very nicely for table use in this section. Continues in fit condition for table over a very long period and generally lasts until after frost in the fall. See price list following.

## Country Gentleman or Shoe Peg

A great old favorite variety. Many prefer Country Gentleman to all other strains. Late and remains in good condition a long period. Ears 7 to 9 inches long, kernels small but very deep and set very close and unevenly on the cob. Very tender and delicious. Country Gentleman has a flavor all its own. See price list following.

## POP CORN

### White Rice

The most popular widely-known variety. Prices by mail: ½ lb., 10c; 2 lbs., 30c; postage paid.

### Black Giant

A heavy yielder of large ears and a sure popper. Excellent for home use.

Prices by mail: ½ lb., 10c; 2 lbs., 30c; postage paid.

### Japanese Hulless

A heavy yielder of short, thick ears, and shells out heavy on account of very deep grains. An excellent popper, very tender and of delicious quality.

Prices by mail: ½ lb., 10c; 2 lbs., 30c. Postage paid.

## CUCUMBERS

Sow seeds in open ground soon as danger of frost is past. Plant in hills and thin down to 3 or 4 in a hill. A good rich soil is the best precaution against insects and blight.

### Early Green Prolific

(Boston Pickling)

A very productive variety extensively grown for pickling. Fruit, bright green, medium size, smooth and uniform. See price list following.

### Arlington White Spine

An improved white spine of exceedingly fine quality, especially fine for slicing and quality good for pickling. Grows quite large. We strongly recommend this variety. Prices following.

White Spine Cucumber

## Early Green Cluster

A very early variety, medium length, produces bulk of crop near the root in clusters. A good pickling variety. Prices following.

## Chicago or Westerfield Pickling

One of the very finest types of pickling cucumbers—grown extensively by pickling establishments on account of its very uniform type and size. A heavy yielding, hardy strain. See price list following.

## Davis Perfect

A very fine type cucumber. One of the smoothest and most uniform in shape and color, very small seed cavity. Grown extensively for a slicing cucumber and for fancy dills. See price list following.

## Improved Long Green

An old-time favorite. Fruit long and slim. Exceedingly fine quality. Good for both pickling and slicing. Prices following.

## CRESS

### Upland or Garden Cress

A very fine early salad with the pungent flavor of water cress. Ready for use earlier than any other salad. Many people use cress, to mix with lettuce to which it adds a very desirable flavor.

Pkt. 10c; oz., 15c.

## EGG PLANT

Sow early in the spring in house or hotbed. Transplant same as tomato or cabbage when danger of frost is past.

### Black Beauty

The best of all. Fruit very large and handsome and of a deep glossy purplish black color. It is as early as any. Our stock is of the finest strain..

Pkt., 10c; oz., 50c.

## ENDIVE

A fine fall and winter salad. Many relish Endive on account of its pungent flavor. Used same as lettuce. Sow from June to August.

### White Curled Endive

Very tender when cut young. Blanches readily.

Packet, 10c; oz., 15c.

**EVER GREEN  
KILLS ANTS**

35c bottle makes  
2 gallons of solution

## GARDEN HERBS

### Caraway

Grown for the seeds, which are used for flavoring of breads, pastry, etc. Pkt., 10c; oz., 20.

### Dill

Grown chiefly for making dill pickles. Sow early in the spring in rows. Cover seed  $\frac{1}{2}$  inch. Mammoth.

Pkt., 10c; oz., 20c;  $\frac{1}{4}$  lb., 40c.

### Garden Sage

Used for seasoning meats, etc. Home grown sage is better than most commercial stock. Broad leaf, used as a seasoning for dressings.

Pkt., 10c; oz., 30c.

## KOHL RABI

A very delicious vegetable grown very extensively in Europe and now becoming very popular in this country. Looks like a cross between a cabbage and turnip, forms a turnip, but above ground. It is very fine eating, better than either cabbage or turnip; should be cooked same as cauliflower. It is very easily grown; simply sow like turnip in rows and thin out in order to make room for the roots to form.

### White Vienna

This is the all-around best variety of Kohl-Rabi. Color white, flesh white; tender and delicious.

Price: Pkt., 10c; oz., 30c.

## LETTUCE

Lettuce is so commonly grown by all that instructions for growing are unnecessary.

### Early Curled Simpson

A very early variety. Forms a close compact mass of curly yellowish green leaves. Tender and crisp. A great favorite with market gardeners. See price list following.

### Black Seeded Simpson

We have a very fine strain of this variety, carefully selected. This is a very popular loose-leaved sort. A favorite with market gardeners. See price list following.

### Grand Rapids

An exceedingly fine early lettuce and a great favorite with market gardeners for forcing. This does not form heads, but makes large compact bunches of light leaves with fringed edges. Delicious quality and handsome appearance. We strongly recommend Grand Rapids. See price list.

### Prize Head

A very large loose heading sort. Leaves crimped and fringed, outer ones shaded reddish brown. A high quality lettuce, crisp, sweet and tender. Splendid for home garden use. See price list following.

### Improved Hanson Head

A very hardy high quality head lettuce for home use. Heads compact with inner leaves blanched almost white. Quality fine, crisp, tender and delicious. See price list following.

### California Cream Butter

Forms sound, crisp, solid heads of buttery flavor, medium early. One of the finest sorts of head lettuce. Very crisp and tender. If you want a fine lettuce try California Cream Butter. See price list following.

### New York No. 12

An improved type of New York or Los Angeles Market. This is the mammoth head lettuce being grown in such enormous quantities for market in all the Western growing districts. Heads often weigh  $2\frac{1}{2}$  to 3 lbs., crisp, hard and tender. Blanching out to a creamy white in center.

There is no finer, harder strain of head lettuce than New York No. 12. See price list following.

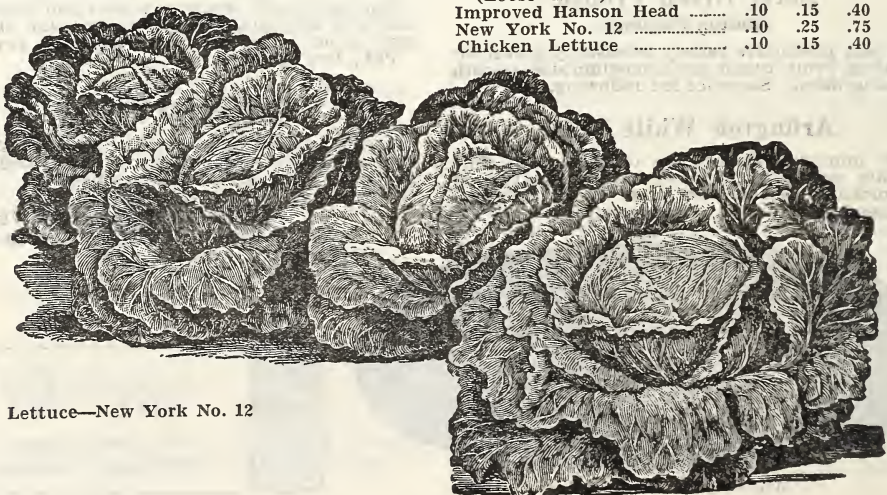

### Chicken Lettuce

This lettuce yields an immense amount of chicken or rabbit feed. It does not form a head, but sends up stalks 3 to 4 feet high loaded with leaves. These leaves can be pulled off like kale. When cut it starts to grow again. See price list.

Osage Musk Melon

## MUSKMELON

Plant in rich warm soil after danger of frost is past and weather warms up. In our section this will be from the middle of May to first week in June. Sow plenty of seeds in hills 4 to 5 feet apart and thin down to 4 or 5 plants when well started.

### Osage or Miller's Cream

Of medium size, oval form, dark green in color, somewhat netted and slightly ribbed. Flesh extremely thick, of firm texture, rich salmon in color. Highly flavored and delicious to the rind. Seed cavity very small. A remarkable keeper and a good shipping melon. Particularly good for Southern Idaho. See price list.

### Pollock—10—25

A decided improvement on the famous old Rocky Ford with yellow flesh shading to green near the rind. The flavor is very sweet and spicy. Rind heavily netted, tough, making a wonderful shipping melon. Very popular as a market melon. Our stock of Pollock is very select. See price list following.

### Tip Top

This very productive melon is of medium to large, nearly round, slightly ribbed and fairly well covered with shallow netting. The flesh is deep yellow in color, and of remarkable sweetness, firm but not hard-fleshed, eatable to the very coating. See price list.

### Hale's Best

An extra early salmon fleshed cantaloupe of remarkable flavor. Seed cavity is very small with corresponding thick flesh. Type oblong, well netted, size just right for a shipping melon. Hale's Best is ten days to two weeks earlier than most shipping melons and a wonderful yielder. Flavor of the finest, sweet and spicy. See price list following.

### Banana Musk Melon

Yellow fleshed. Grows 15 to 20 inches long, four to six inches in diameter. The thick salmon colored flesh has a delicious flavor and gives out an aroma like a banana. Many are extremely fond of this large melon. See price list.

### Rocky Ford

An old favorite cantaloupe, many prefer its spicy delicate flavor to all others. Very popular in the markets. Type small and round with heavily netted rind, flesh green. We carry a select stock of Rocky Ford. See price list following.

## Hearts of Gold

As a melon for private garden, Hearts of Gold will surely please all who plant it. Also used in some sections extensively as a market melon. The melons are not large, but of convenient size for table use and present a fine appearance. Rind very firm and heavily netted; flesh, rich, deep orange color; thick and of remarkable sweetness. We strongly recommend this fine melon to our trade. See price list following.

## Honey Dew

Something very distinct in melons. Skin perfectly smooth and of delicate yellow color. Rind thin but very firm—flesh white to emerald green. Honey Dew is very sweet and has a decided honey flavor, very delicious. See price list following.

Commercial Melon Growers write for quantity prices—Our stocks are best select strains.

## WATER MELONS

Instructions for growing same as for Musk Melons.

### Cole's Early

Very early and a sure melon for our cooler sections. Oblong in shape and of good size, mottled green in color with thin brittle rind. Flesh a good red and very sweet, seeds black. Cole's is a fine early melon. See price list following.

### Phinney's Early

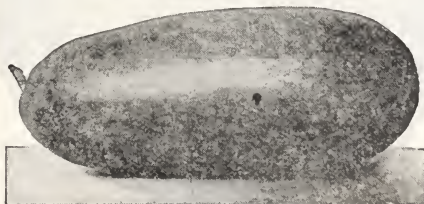

Few of the early sorts surpass this old favorite. It is the first to ripen, of good size and productive. Oblong in shape, marked with two shades of green. Melons mature early and vines bear abundantly. See price list.

### Tom Watson

A very large, oblong, dark green melon, of attractive appearance. Rind thin, but very tough, a splendid shipper. Flesh bright red and deliciously sweet. Grown very extensively as a market sort. See price list following.

### Kleckley's Sweet

A splendid sort. One of the sweetest of melons. Skin dark green, flesh bright red and very delicious. Valuable both as a market sort and as a home melon. A great favorite. Early and a heavy producer. See price list.

Kleckley's Sweet Watermelon

### Irish Grey

This new melon is meeting with great favor as a market strain. It is a wonderful shipper. A long, light gray mottled melon, larger than Kleckley's Sweet. Rind thin and very hard; flesh, deep red and very sweet. Matures about the same time as Kleckley's or Tom Watson. Market melon growers should try this. See price list.

### Black Seeded Klondike

A very popular new melon. The seeds are quite small and brownish black in color. Klondike is a very high quality melon for home use and for shipping a moderate distance. It makes an average weight of about 25 pounds, the shape is medium long, slightly tapering at the seed end. Skin dark green, rind thin but tough. The flesh of Klondike is very dark red, very sweet and delicious. See price list following.

Commercial Melon Growers write for quantity prices—Our melon stocks are select strain.

## OKRA OR GUMBO

Okra pods are used in soups, stews and salads. The pods should be gathered each day while still tender and pulpy.

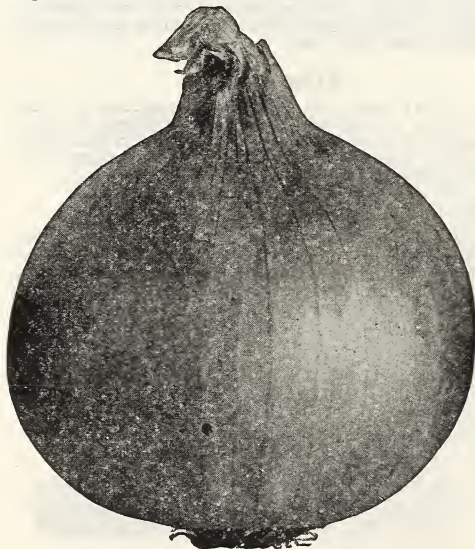

### Dwarf Green Okra

The best variety of Okra for this section. Grows low and stocky. Is very productive. Sow in open ground in May.

Pkt., 10c; oz., 15c.

## MUSTARD

Used extensively for greens and hard to beat for that purpose—Sow any time from early spring to August 1st.

Valencia Onion

### Southern Giant Curled

Produces large, lark green leaves with extra curled edges. Fine for salads and greens. Pkt., 10c; oz., 15c.

### White London Mustard

Mostly grown for its large, round yellow seed, which is used extensively in pickles and for seasoning; also for greens. Pkt., 10c; oz., 15c.

## ONIONS

Onions have become an established cash crop in most of the irrigated sections of the West. These irrigated districts have great advantages for onion production, the necessary conditions for development and maturity of the onion crop are under control of the grower. The result is that enormous yields of high quality stock are produced. If the market is reasonably good the onion crop is very profitable.

If you are growing onions commercially, good seed of the most popular market strains is of very great importance. Every experienced onion grower will agree with us on that. We carry the very best of stock in all the best market strains.

YOU CAN DEPEND ON DARROW'S ONION SEED

### Yellow Globe Danvers

This fine onion is of large size. An early and abundant cropper. Bulbs are very thick, neck small. Handsome in appearance and a good dark yellow color. A good variety for this section and a good market onion. See price list following.

### Mountain Danvers (Yellow)

A special market type selection from Yellow Globe Danvers. It matures earlier and is more uniform in size and shape, firmer and a better keeper. We carry a special hardy mountain grown strain for our commercial onion growers.

All large onion growers should be interested in Mountain Danvers. It is one of the prettiest type onions ever introduced, the bulbs are nearly round, very seldom produces a scullion of big neck. It is extremely early in maturing and dries down hard and heavy; the heaviest onion for the size we have ever seen. In size it would not be called extremely large, runs very few small specimens, the evenest running sort we know of. A good big yielder, as nearly all the onions on the field are of marketable size. As a keeper Mountain Danvers has no superior, being extremely hard and firm. It will carry longer than most any other variety. See price list following.

### Prizetaker

Grows to an immense size and for early marketing it is unexcelled. Although of such great size it is a fair winter keeper. Ripens up firm, very fine grained, mild delicate flavor. Color rich yellow. See price list following.

### Southport Red Globe

The deep red color of our Southport Red Globe is one of its superior points. Very large and uniform in size and appearance. Wonderfully hard and firm, a great late keeper. One of the handsomest onions in cultivation and a great market onion on account of its appearance and keeping qualities. See price list following.

### Southport White Globe

This onion grows to a very large size and is a perfect globe shaped sort. Color pure white, a good keeper and excellent market variety. A beautiful appearing onion. Give it a trial. See price list following.

### Extra Early Barletta

The very earliest onion in cultivation. One of the best for pickling, being naturally quite small. Pure white, mild and delicate; makes an extremely pretty bunch onion. See price list following.

### Silver Skin or White Portugal

This beautiful white onion is fine for growing early bunch onions. It has a fine mild flavor and is one of the best keeping white onions. Size medium type, inclined to be partly flat. A good home garden sort. See price list following.

### Crystal Wax Bermuda

This is a pure paper white flat onion. The mildest flavored and sweetest of all onions. For onion quality there is nothing to compare with the Bermuda. Crystal Wax does wonderfully well here maturing away ahead of any other onion. Bermudas are not long keepers but are very fine for early marketing and for home use. See price list following.

### Yellow Bermuda

Similar to the Crystal Wax Bermuda but yellow in color and larger; not quite so early. Very mild and fine flavored. This onion is grown very extensively in the South for early Northern markets. See price list following.

### Yellow Sweet Spanish (Riverside Strain)

This is a large fine uniform typed market onion averaging generally 1 to 3 pounds. The Riverside strain is a special selection from the original imported Sweet Spanish and an improvement on that famous onion. Bulbs are true globe type, necks very small and when thoroughly cured makes a very good keeper and a great market onion. Riverside Sweet Spanish is an enormous yielder and a money maker. We have a very select stock of this strain. See price list following.

### Valencia Sweet Spanish (Imported)

If you are a commercial onion grower and could find a better strain of onion seed than you have had before—that's what you want isn't it? That's just what we have in our Imported Valencia Sweet Spanish. Our customers are producing the finest uniform type, hardest and largest onions we have ever seen from this fine stock and so can you. The Valencia appears to be a better type and better quality onion than the regular Sweet Spanish commonly grown here. It is more uniform in size, making a heavier yield of large onions, and that means more profit.

This strain is not quite so dark in color as the old Sweet Spanish but is usually a bright straw color, and very attractive. Our stocks of Valencia are limited and we suggest that you place orders early. See price list following.

### White Sweet Spanish

The White Sweet Spanish is in many respects similar to the well known Valencia type especially in size and the mildness of its flavor. The pure white flesh of this onion is fine grained and unusually sweet and mild.

In sections where it can properly be matured it is a good keeper and shipper. It has the advantage of the white skin which makes it a more desirable onion for the market. See price list.

### Earliest Express

This is another Spanish onion of great value. Earliest Express is beyond doubt the earliest maturing onion ever offered the trade and should prove a winner for the early market. It is very sweet and mild, fully equal to Bermudas in quality. Earliest Express is globe type, a white or light straw colored onion. Give this a trial. See price list following.

### ONION PLANTS

For quick and delicious green onions there is nothing equal to good Crystal Wax or Bermuda onion plants. In just a few weeks time they are large enough for use. If allowed to grow they soon give you a supply of mild, sweet Bermuda onions. See price list following.

Prices—100, 30c; 500, \$1.25; 1000, \$2.00; 6000, \$9.60. By mail, postage paid to all zones.

### ONION SETS

Onion sets are perishable; they do not keep well except while weather is cool and in consequence we have to be careful not to overstock them. Anyone wanting sets should get their orders in just as early as possible.

Prices—Yellow Globe Sets, White Globe Sets, Red Globe Sets—Write for prices.

If you are a Commercial Onion grower, using seed in large quantities, write or see us for prices, stating quantity needed.

### PEAS

Peas can and should be planted as soon as the ground is ready to work. The smooth seeded varieties should be planted first for earliest use and followed, soon as ground warms up, with the wrinkled strains for later use. Sow them real thick for best results, 1 pound to 50 feet of row is none too thick.

### Early Alaska

(Extra Early)

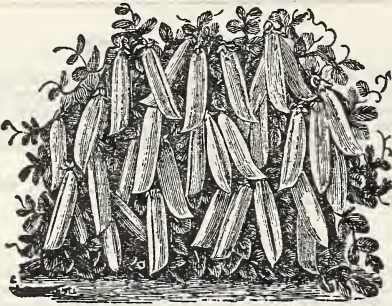

Well-known and extensively used as an extra early variety. Vine is strong and vigorous, 2 to 2½ feet tall, pods 2½ to 3 inches long and well filled. Ready for picking about 60 days from planting. Peas round, blue, slightly pitted. Quality good, very productive. See price list following.

### Hundredfold

A new pea which is proving wonderfully popular with the market gardener, as well as for the home use.

One of the earliest of the dwarf wrinkled varieties, of the Laxtonian type. Vines 2 feet high, sturdy, dark green and very productive, pods dark green, four inches long, fairly broad and pointed, containing 8 large, dark green peas of excellent quality. See price list.

When you order Garden Seeds—include Hammond's Slug Shot for protection against insects.

American Wonder Peas

### American Wonder (Early)

The earliest of all wrinkled peas. Of very dwarf habit, from 9 to 12 inches tall, producing an abundance of good sized and well filled pods.. American Wonder is of very fine flavor, sweet and delicious. See price list following.

### Premium Gem (Medium Early)

Strong and vigorous grower, producing vines from 18 to 24 inches tall, dark foliage. Pods about two and a half to three inches long, light in color and blunt at ends. Ready to pick about 65 days from planting. Peas green, wrinkled, of medium size and very sweet. An old favorite medium early sort that deserves its popularity. See price list.

### Bliss Everbearing (Late)

The vines are strong, attaining a height of 2½ feet. Pods about 3 inches long. If the first pods are picked when ready the plants throw out new branches bearing pods which will mature in succession, which accounts for the name "Everbearing." The peas are large wrinkled, and of good flavor. See price list following.

### Laxtonian (Early)

A large podded, extra early strain of exceedingly fine quality, grown extensively both as a home garden and market sort. Medium dwarf in habit of growth, but with very large pods, averaging five to six inches in length. Pods well filled with large peas of great sweetness; seldom any blank spaces in pods. See price list following.

### Peter Pan (Early)

A new pea which is proving wonderfully popular. One of the very finest of the large podded, dwarf peas on the order of Laxtonian, but a little earlier. Height of vines about 15 inches. Vine and foliage stout, heavy and dark green; pods 3¾ inches long, very broad, straight and pointed, containing 6 to 8 large, dark green peas of superb quality. See price list following.

### Little Marvel (Early)

One of the finest, early dwarf wrinkled peas. Pods somewhat larger than Nott's Excelsior, and same season. A fine variety for either the home or market garden.

Height 18 inches, foliage and pods very deep green, pods 3 inches long, nearly round and square ended, containing 7 very dark green peas of high quality. Very productive. See price list.

### Carter's Daisy or Dwarf Telephone (Late)

Vines 18 to 20 inches high with rather coarse foliage, medium light green in color. Pods about four inches long and well filled with large delicious wrinkled peas. Ready for picking about 65 days from planting. See price list.

### Carter's Telephone (Late)

Vines and leaves large and coarse, foliage light green in color. A tall grower, but we have no difficulty in keeping them upright. Pods about four and a half inches long and well filled with the sweetest and best peas imaginable. Fit for picking about 65 days from planting; a good yielder. If you want quality in peas plant Carter's Telephone; there is nothing finer. See price list.

## PARSLEY

### Moss Curled

A very fine curled variety. One of the handsomest for garnishing purposes. The exceedingly curled leaves make it desirable.

Pkt., 10c; oz., 15c.

## PARSNIP

Sow as early in spring as ground can be worked, in drills about 18 inches apart. Do not cover deep. Hoe and cultivate often. Can be left in ground all winter, which improves the flavor, but do not allow them to stand over and go to seed, as they are apt to run wild and become a weed.

### Hollow Crown Sugar

This is the most popular and perhaps the best all-around variety of parsnip. Roots are long, white, smooth and tender, of excellent flavor.

Prices—Pkt., .10; oz., .15; ¼ lb., .30; lb., \$1.00  
Postage paid.

## PEPPERS

Sow in hotbed in March and when soil has become warm transplant in rows two feet apart and about 18 inches apart in row. Cultivate well. Peppers do very nicely in this section.

### Large Bell or Bull Nose

A very large sort of inverted bell shape. Suitable for filling or for mixed pickles. Flesh thick, hard and less pungent than most sorts.

Pkt., 10c; ½ oz., 35c; oz., 60c.

### Ruby King

On improved sort reaching a very large size, yet retaining the symmetrical shape of the smaller sorts. An old favorite.

Pkt., 10c; ½ oz., 35c; oz., 60c.

Ruby King Pepper

### Chinese Giant

Without a doubt one of the very best and largest Mango Peppers ever introduced. Its mammoth size, splendid shape and mild flavor commend it very highly.

Pkt., 10c; ½ oz., 40c; oz., 75c.

### Pimento or Perfection

A medium early, prolific, perfectly mild variety, with extremely thick flesh. On account of its thick flesh it will hold up for a long time and is an excellent sort for canning whole. Very popular on the market.

Pkt., 10c; ½ oz., 35c; oz., 60c.

### Red Chili Pepper

Used in the manufacture of pepper sauce and in salads. Pkt., 10c; ½ oz., 40c; oz., 75c.

## PUMPKINS

### Small Sugar Pie

A rather small but handsome variety. Shape round, skin deep orange color, flesh fine grained and sweet. See price list.

### Big Tom

One of the best varieties for field purposes. Particularly desirable for stock feeding. Grows to very large size. See price list.

### King of Mammoths

Grows to enormous size, the largest pumpkin in cultivation. It is always a winner at fairs and exhibitions. Exceptionally valuable for stock feeding.

### Japanese Pie Pumpkin

Of medium size, good keeper. Weight 15 to 20 pounds each. The flesh is a rich salmon color, unusually fine grained, cooks very dry and mealy

like a sweet potato. As a pie pumpkin Japanese Pie has no equal. See price list.

## Tennessee Sweet Potato Pumpkin

Hardy, productive, sweet and delicious. One of the best for cooking purposes ever introduced. Fine for pies. See price list.

## RADISH

### Early Scarlet Turnip

The standard early turnip radish, small, round, bright red, of very quick growth, crisp and tender, Scarlet Turnip is a very popular radish.

See price list following.

### Sparkler—White Tipped

One of the most popular and attractive of the early turnip sorts. The roots are of good size, bright scarlet on top, lower half white, making a very beautiful contrast. Our stock of this very popular strain is very fine. See price list.

### French Breakfast

Medium sized and very early. Shape oval or half long. Color bright red with white tip; crisp and tender. A beautiful radish and a favorite early sort. See price list.

### Crimson Giant

A new radish, double the size of any of the turnip shaped type. Does not get hollow or pithy. The flesh is white, solid, crisp and juicy and of the mildest flavor. Shape varies from round to almost oval. We strongly recommend Crimson Giant. See price list.

### Cincinnati Market

The tops of this radish are very small. The brightest and handsomest long scarlet radish

Early Scarlet Turnip Radish

known. Fit for use in 25 days from sowing and remains in good condition until full grown.  
See price list following.

### White Icicle

A beautiful transparent white variety. About three inches long, with small tops. Crisp and brittle and remains in good condition a long time.. Does not get pithy. See price list.

### Chinese Rose Winter

Bright rose color. Shape cylindrical or largest at bottom. One of the very best for winter use. Flesh firm, crisp and tender. See price list.

### California Mammoth White

First introduced into this country by the Chinese in California. It is pure white, about one foot long and two or three inches through, tapering regularly to the tip. The flesh is tender and crisp, keeping well through the winter.  
See price list following.

## RHUBARB

A very good way to get rhubarb is to sow the seed in very rich soil and transplant the roots the following autumn to trenches well filled with good soil mixed with well-rotted manure.

### Victoria or Mammoth

Very large, fine, cooking variety. Stalks a beautiful red. Gives satisfaction everywhere.  
Pkt., 10c; oz., 15c.

### Early Linneaus

A large early variety, very tender and fine flavor. Bright red stalks. Pkt., 10c; oz., 15c.

## SALSIFY OR OYSTER PLANT

Cultivate same as carrots or parsnips. A part of the crop can be left on the ground until spring when it will be found fresh and plump. A delicious vegetable.

### Mammoth Sandwich Island

This is the best all-around variety of Salsify.

Pkt., 10c; oz., 20c; ¼ lb., 65c.

## SPINACH

Sow early as possible in the spring for early use or in August for fall use. If you sow in September or October or even later, let stand through winter, it will bring you very early spring greens

## King of Denmark

A very fine new strain from Denmark. The leaves are large, rounded, somewhat blistered and deep green. The plants grow vigorously and are ready to use as soon as any kind, while at the same time it remains a long time in good condition after other kinds have gone to seed.

Pkt., 10c; oz., 15c; ¼ lb., 25c; lb., 50c.

## Bloomsdale

A great favorite. Thick, dark leaves, closely crimped, very fine quality, early and lasts well.

Pkt., 10c; oz., 15c; ¼ lb., 25c; lb., 50c.

## Long Standing

Produces large thick, dark green leaves somewhat crumpled. Comes early and lasts well for summer use. Popular for market.

Price: Pkt., 10c; oz., 15c; ¼ lb., 25c; lb., 50c.

## Mustard Spinach

Japanese Mustard Spinach is a quick growing vegetable of Oriental origin. Can be cut 4 weeks after planting. The large leaves are dark green and are cooked the same as spinach, will stand extreme heat, also resistant to cold. If you try Mustard Spinach we think you will like it.

Prices: Pkt., 10c; oz., 15c; ¼ lb., 30c.

## SQUASH

### Warty Hubard

A popular old standard variety. Very dark green color, skin heavily warted. A wonderful keeper and none better in quality. Flesh thick bright yellow, dry and sweet. See price list following.

### Gregory's Delicious

A squash of outstanding merit for table use. Size medium, shell moderately hard and very thin, flesh very thick, fine grained and of a bright yellow color—shape oval, skin green with some mottled specimens. Delicious matures early and is a wonderful keeper. None better for quality. See price list following.

### Banana Squash

This squash is becoming very popular in all sections. Grows one to two feet in length. The skin varies from a bright yellow to dark olive green. Flesh firm and solid, beautiful orange yellow and of excellent quality. A wonderful keeper for winter use. See price list.

Mustard Spinach

## Early White Bush Squash

(Summer Squash)

Is earlier than any other variety. Of dwarf habit and very productive. Color white, shape scalloped. See price list.

## Yellow Crookneck (Summer Squash)

Early and prolific. The fruits are true crookneck type, heavily warted and of a light golden orange color. Very fine quality.

## Table Queen Squash

Is a small, very dark green, acorn shaped squash. The flesh is lighter in color than the Hubbard. Fine grained. Has an excellent flavor when baked. Cooks right up to the shell, which is thin and quite tough. Fruits are five to six inches in length and three to four inches in diameter. Matures early and is a good keeper. See price list following.

## Mammoth Chili

Attains an enormous size, often reaching a weight of 200 pounds. Despite its size the flesh is rich and fine flavored. It is particularly valuable for stock feeding and for exhibition purposes. An enormous yielder. See price list following.

## TOMATOES

### Burbank

The earliest, smoothest, most productive and best tomato. Bright crimson, thick, smooth and firm with few seeds. Unusually heavy and of the finest quality. Keeps well and a good shipper. Very resistant to wilt and other diseases. Has the unusual feature of being easily peeled, the skin slipping readily from the flesh. See price list.

### Marglobe

A new variety developed by United States Department of Agriculture. Very wilt resistant and is a handsome deep red globe-shaped tomato of great merit. Plants are vigorous, dark green and productive; fruits are quite large and have very solid flesh with excellent quality. See price list.

### John Baer Tomato

An extra early tomato of remarkable quality, perhaps the most popular variety in this section. Fruit large, smooth, firm and of a bright red or scarlet color. It's hard to beat the John Baer. See price list following.

### Ponderosa

A purplish pink tomato of enormous size. Medium early, a good bearer and of good flavor. Ponderosa has many admirers and if one wants a very large tomato this variety is unequalled. See price list.

Warty Hubbard Squash

## Dwarf Champion

Dwarf, compact and upright in habit of growth, with very thick, short jointed stems; requires no stakes. Color deep red with purplish tinge. Fruit round, very smooth and beautiful. A very fine quality and flavor. We regard Dwarf Champion one of the very best tomatoes for this section. It is very hardy and will withstand frost better than any other variety we know of. See price list following.

## Langdon's Earliana

This is the earliest of all tomatoes, without doubt. Large in size and beautiful in color. Nearly seedless and very solid and vigorous grower and a heavy yielder. Not as smooth as Chalk's Jewel, but earlier. A great favorite in this locality.

See price list following.

## Yellow Pear Tomato

A small yellow pear-shaped variety used for preserving. See price list following.

## Husk Tomato or Ground Cherry

Fruit golden yellow, size of a cherry. Fine for pies or preserves. Easy to grow—simply sow them and let them grow. See price list following.

## RUTABAGA or SWEDISH TURNIP

### Yellow Perfection

A new rutabaga of great merit. One of the best for general crop. It produces a globe-shaped root, with smooth skin and light yellow flesh which is firm and sweet. See turnip price list.

### Improved American

This is a fine purple topped variety. Flesh yellow and very sweet; one of the very best sorts for table use, also for stock feeding. See turnip price list.

## TURNIP

### Early Snowball

A perfectly globe-shaped, white skinned turnip. Exceedingly productive. The flesh is fine grained, firm and of very delicate flavor. See price list following.

### Early White Flat Dutch

An exceedingly early white variety. One of the very best for spring sowing. Shape flat, flesh white, firm and sweet. See price list following.

### Purple Top Strap Leaved

Rapid grower and of mild flavor. Good for both table use and stock feeding. A large variety and an old favorite. See price list following.

### Early White Egg

A favorite early turnip with our trade. It is oblong in shape; skin very white; flesh firm, sweet. See price list following.

### Purple Top White Globe

An early variety. Globe-shaped, heavy cropper. A handsome looking bulb, grows quite large. Good for both table and stock feeding. See price list following.

### Amber Globe

One of the best yellow fleshed varieties. The roots are of large size and of globular shape. The skin is clean yellow except the top which is tinged with green. The flesh is light yellow, fine grained and sweet. This variety keeps well and is a good cropper. See price list.

### Yellow Aberdeen

A round, medium size, light yellow strain with purple on top, produces a large crop; flesh very firm, tender and sweet. See price list.

On all orders for Garden and Flower Seeds, Poultry Feeders, Fountains, Etc., mailed us during the month of February you may deduct 10% from Catalog prices. If you want to save money, why shouldn't you do so by giving us your order early? This offer does not apply except on goods as stated above.

Darrow Bros. Seed & Supply Co.

We obtain our flower seeds from the largest and one of the best flower seed growers and dealers in the United States, and handle nothing but their finest strains. No one has anything finer to offer you. Stock is bought in bulk and packaged by ourselves.

## Annual Flower Seeds

### Alyssum—Little Gem

An extra fine strain, the very finest. Dwarf, compact plants, producing a mass of pure white bloom from spring until fall frost. Fine for borders, edging and ornamental work.

Packet, 10c; oz., \$1.00.

### Antirrhinum—Snapdragon

This fine old-fashioned flower is again becoming very popular. It has been greatly improved in recent years. As a bedding plant it blooms continuously until late in the fall. Grows two or three feet tall. The long spikes of brilliant colored flowers are valuable for cutting. Sown in early spring it blooms freely the first season and will live throughout winters, coming on again the next season.

Snapdragon — finest mixed—containing all the choicest varieties in all colors, the very best mixture obtainable. Packet 10c.

Pink, Packet, 10c.

Yellow, Packet, 10c.

White, Packet, 10c.

3 Packets, 25c.

### Ageratum

One of the best summer blooming plants grown from seed. They are rapid growers, early and constant blooming. During the hot, dry summer months their bright flowers are produced in the greatest profusion. Colors are blue, lavender and white.

Finest mixed, Packet, 10c.

### Arctotis

#### Blue Eyed African Daisy

It forms much branch bushes, 2 to 3 feet high, its daisy-like flowers are pearly white with a gold band surrounding a delicate mauve center. It is not only pleasing when open, but also when it closes at evening and displays its lilac tinted underside. Foliage gray-green. Especially good cut flower.

Packet, 10c.

### Balsam—Lady Slipper

Beautiful half hardy annuals from one and a half to two feet in height. Sow seed early in spring and protect against frost. All best varieties mixed.

Packet, 10c.

### ASTERS

#### Queen of The Market Aster

The best early Asters, usually in full bloom two weeks before most other sorts begin to blossom. Of graceful spreading habit. Colors run white, pink, crimson, scarlet, light blue, lavender and dark blue. We carry this strain in the mixture only. Finest mixed, Packet, 10c.

#### Darrow's Special Asters

We carry a special mixture of many sorts of Asters, including the single Chinese and a large assortment of others.

Packet, 10c.

#### Giant Comet Asters

No class of Asters is finer than the Comet strain. Flowers are of the finest type, full and double, large and fluffy. Flowers grow to immense size, often measuring over five inches in diameter, resembling Chrysanthemums in size and appearance. Plants grow to a height of 15 to 18 inches. Colors run white, rose, pink, lavender, and purple.

Giant Comet, snow white, pkt. 10c.

Giant Comet, lavender, pkt., -0c.

Giant Comet, flesh pink, pkt. 10c.

Giant Comet, purple, pkt., 10c.

3 pkts., 25c.

Giant Comet, special mixed, including all of above, packet, 10c, 3 packets, 25c.

#### Crego Asters

This type of Aster produces flowers of immense size, born one stems 12 inches or more in length. Petals are wonderfully curled and twisted, resembling Chrysanthemums. Blooms from late August to October.

White, shell pink, rose pink, crimson, lavender, dark blue.

Each of above, packet, 10c, any three, 25c.

Mixed, all colors, packet, 10c.

#### Single Marguerite Asters

These beautiful single Asters are becoming very popular with flower lovers. Plants strong, vigorous and of handsome pyramidal form, very free blooming and produce their flowers on long slender stems. The flowers are from 2 to 3 inches in diameter with small yellow centers, and will last a week when cut.

Single Asters, very finest mixed, packet, 10c.

## Sunshine Asters

One of the most attractive novelties. Plants are sturdy and strong with long flower stems, making wonderful cut flowers. The petals of Sunshine Asters are beautifully twisted and quilled, all have a cushioned center of tiny quills of contrasting colors and look as if covered with snowflakes. Colors are white, blue, pink, rose and lavender.

Finest mixed, packet, 15c, two for 25c.

## Castor Bean

See Ricinus

## Candytuft

Showy, hardy annuals, very useful for edging and masses; excellent for cutting. Continuous bloom from July to October.

Dwarf white, packet, 10c.

Finest mixed, packet, 10c.

## Calendula (Pot Marigold)

One of the finest and showiest free flowering hardy annuals, growing in any good garden soil, producing a fine effect in beds or borders. Continues in bloom from early summer until frost. Flowers are ball-shaped and of a bright glistening orange color. No flower garden is complete without Calendula.

Packet, 10c.

## Clarkia

Clarkias are becoming very popular as summer annuals, perfectly hardy and very easy to grow in ordinary garden soil. Plants grow to a height of about two feet and are exceedingly bright and attractive, especially in large masses. Colors range through different shades of pink, rose, salmon, red and white. Very profuse bloomers, nothing more attractive.

Darrow special mixture, all colors, packet, 10c.

## Carnation

Margaret Mixed—These Carnations have created a sensation, not only on account of their beautiful colors, but unlike all others, they bloom in about

four months from sowing the seed. Bloom until checked by frost.

All colors mixed, packet, 10c.

## California Poppy

The state flower of California. A bright free flowering plant of low spreading growth. The poppy-like flowers in pure shades of yellow, orange and crimson are produced from early spring until frost. Sow the seeds where the plants are to remain. Golden West, finest yellow.

Packet, 10c; oz., 75c.

## Cypress Vine

A most beautiful and popular tender climber, with very delicate fern-like foliage and numerous bright red and white, star-shaped flowers.

Packet, 10c.

## Cardinal Climber

No annual vine has ever gained more popularity than the beautiful, hardy Cardinal Climber. In appearance it resembles a cross between the Morning Glory and Cypress Vine. The foliage is very delicate and beautiful, leaves are nearly as large as Morning Glory, but delicately cut and of lacy appearance. Flowers are like small Morning Glories, bright cardinal in color, rapidly attaining a height of 15 to 20 feet in a season. Sow early just as you would Morning Glory.

Packet, 15c; two packets, 25c.

## Centaurea—Bachelor's Button

Known as Ragged Sailor or Cornflower. One of the most popular old-fashioned flowers. Easy to grow and always furnishes an abundance of bright, cheerful bloom. Colors run to blues and pinks.

Finest mixed, packet, 10c.

## Calliopsis

One of the most showy of all annuals, the colors being so striking as seldom to be passed without remark.

Finest mixed, packet, 10c.

Crego Aster

### Calliopsis Radiata

A new strain of Calliopsis. Flowers large, reddish-brown, turning at points to golden-yellow, spotted and blotched. Very striking and beautiful. Packet, 10c.

### Cosmos

A very effective autumn flowering plant, with beautiful foliage, growing from 6 to 8 feet high, literally covered with a very large single daisy-like flower in shades of rose, purple, red and white. For cutting, one of the finest flowers known. Sow in open ground soon as danger of frost is past.

Best early mixed, packet, 10c; oz., 50c.

### Cosmos—Early Flowering Double

These grow to a height of about three feet, forming a perfect bush, bearing beautiful double flowers of good size, on long stems. They come about 65 per cent double from the seed. Bloom in about frost.

Packet, 10c.

### Coxcomb or Celosia

Celosias are interesting and brilliant annuals, and when grown from select seed never fail to please the grower and attract attention.

Best selected mixed, packet, 10c.

### Cobea—Cathedral Bell

(Vine)

One of the handsomest and most rapid-growing climbers. The flowers are bell-shaped and of a purplish-lilac color when full grown. It is a very prolific bloomer and vigorous in vines and flowers. Half hardy annual.

Packet, 10c.

### Dahlia

Sow the seed early in pots or boxes, or under glass and transplant in strong, deep rich soil, and plants will bloom the first season. Few people know that Dahlias can be grown successfully from the seed, but it is no more trouble to produce them than most of the annual flowers. Very striking and entirely new varieties are sometimes produced from seed.

Best double and single mixed, packet, 10c.

Four o'clock

### Dianthus—Japanese Garden Pink

A popular annual variety known to nearly all. The flowers are distinguished for their brilliant contrasting variety of colors, appearing in each flower. Sow seed in open ground in early spring. Start blooming very early and continue until frost.

Best special mixture, all varieties, packet, 10c.

### Four o'clock

An old and well-known favorite. Fine trumpet-shaped flowers in many colors, making a fine summer hedge. Set one foot apart. Sow as soon as danger of frost is past. Bloom first season from seed. Moxed.

Packet, 10c.

### Geranium—Hybrids

A strain of seed saved from fine, new imported Hybrids. The colors are all shades of scarlet, crimson, rose, pink, salmon, cream, veined pink blush, and pure snow white. Few people know that geraniums can be produced from seed the first season and produce blooming plants the first summer, but it is easily done. Sow the seed in open ground when danger of frost is past and try'n plants to give plenty of room. Many new varieties can be developed from seed.

Giant flowering hybrids, packet, 10c.

### Gypsophilla

Angels Breath or Baby's Breath

Graceful plants of light, fairy-like growth. Much in demand for cutting and combining with other flowers for bouquets and vases. Very easy to grow and very popular. Either white or pink.

Packet, 10c.

### Godetia

An attractive hardy annual, deserving more extensive cultivation. The plants bloom profusely and bear showy flowers of satiny texture in many rich and varied colors. They do best in a rather poor soil. Many sorts and colors mixed.

Packet, 10c.

Cosmos

Hammond's Slug Shot gets all kinds of insects.

## Helianthus—Double Sunflower

These dwarf double sunflowers are very showy and attractive and worthy of a place in every garden. Produce immense ball-shaped yellow blooms.

Best double mixed, packet, 10c.

## Heliotrope

Deliciously fragrant flowers of rich purple hue. The flowers and leaves have a mossy effect. Bloom from seed the first summer if sown early in spring.

Fine mixed, packet, 10c.

## Japanese Hop

A splendid annual climber, rapidly covering arbors, walls, trellises, etc. The foliage resembles that of the common hop, but is much more dense. Seed sown in open ground in early spring will produce large, vigorous plants in a very short time. Withstands heat, drouth and insects. One of the most rapid-growing and satisfactory climbers we know of. Does particularly well in this section.

Packet, 10c; oz., 75c.

## Kochia, or Burning Bush

Summer Cypress or Burning Bush. Forms dense bushes of cypress-like appearance. During early fall they change to carmine and blood red..

Packet, 10c.

## Kudzu Vine

Jack and the Bean Stalk

Flourishes where nothing else will grow. The large bold leaves of the brightest green afford a dense shade. Its greatest feature is its wonderfully strong growth.

Packet, 10c.

## Larkspur, or Annual Delphinium

Sow seed in open ground early in spring and thin plants later to stand six to eight inches apart. Flowers remarkable for their great beauty, diversity of shades and striking appearance. Desirable for mixed borders. Flowers grow on long spikes and run through various shades of blue, pink and white.

Giant Hyacinth, flowered mixed, packet, 10c.

## Linum, or Flowering Flax

Crimson Flax, one of the handsomest annuals ever introduced. Fine foliage, brilliant scarlet flowers. A mass of bloom all summer long.

Packet, 10c.

## Lobelia

These are charming little plants covered with numerous small blue blossoms all summer. They flower from seed the first year. Used extensively for borders.

Bedding Queen—Dwarf. Flowers deep purple with white eye. Packet, 10c.

## Moon Flower

Beautiful rapid annual climbers. Foliage is very dense and in some kinds of a remarkable shape. The flowers have a wide range of delicate coloring. The seeds, about the size of a pea, should be notched with a file and soaked in warm water for 24 hours before planting to assist rapid germination.

Packet, 10c.

## Marigold—Tall African

The Marigolds are old favorites, free flowering annuals of easy culture. Bloom all season and are very showy with their large yellow and orange blossoms.

Tall African mixed, large double flowers.  
—Packet, 10c.

## French Marigold

A tall growing strain of Marigolds, more graceful than the tall African variety and of a wider range of color running from the bright yellow into browns. Very attractive as cut flowers.

Packet, 10c.

## Mignonette

No garden is complete without this fragrant plant. Very free flowering and easily raised. An old favorite, Machel Select. This is the finest of sorts.

Packet, 10c.

## Morning Glory

Climbing plants unequalled for rapidity of growth and profusion of bloom; annuals, attaining a height of 30 to 40 feet.

Finest mixed, tall growing. Packet, 10c; oz. 25c.

## Annual Pinks

These flowers are without a superior among annual garden plants. Blooms continually all summer long and are most beautiful and lasting as cut flowers. Of easy culture, bloom first year from seed. Very fragrant.

Best mixed, packet, 10c.

## Petunia

For outdoor decorations or house culture few plants are equal to this class. They commence to bloom early and continue to flower through the entire summer and fall. Give them a rich soil and sunny place and they will make a wonderful display.

Petunia—Hybrids, finest mixed, packet, 10c.

## Ruffled and Fringed Petunias

We offer a special mixture including besides the Giant Ruffled all the colors of the large flowering and fringed sorts. We are sure no other Petunia mixture can produce flowers of a wider range of colors and markings.

Try this mixture by all means.

Packet, 25c; 3 packets, 65c.

Ruffled and Fringed Petunia

## Nasturtium

No garden is complete without this attractive and popular annual. Its varied and brilliant colors, its refreshing odor makes it desirable for table decoration. Blooms continue until frost. Every one should plant nasturtiums.

Tall mixed, finest strains, packet, 10c; oz., 20c.  
Dwarf mixed, finest strains, packet, 10c; oz., 20c.

## Nicotiana—Sweet Scented Tobacco

One of the easiest annuals to raise, and one of the most effective. The blossoms in shape are not unlike a Petunia blossom, but with a longer tube. The flowers open toward evening and emit a powerful perfume.

Tffinis Hybrids—Splendid hybrids in white, red and rose, etc., shades. Packet, 10c.

## Pansies

Seed sown in the open ground in early spring will give fine blooms in late summer or autumn and a good crop of flowers the following season. Plant in a half shady place and keep well watered. The Pansy is one of the most popular of flowers and considering the ease with which they can be grown they should be in every garden.

## Darrow's Special Pansy Mixture

This is a very choice mixture of dozens of good varieties, far superior to the Pansy Mixtures commonly offered at a medium price. Try our special mixture, it is sure to please you.  
Packet, 10c.

## Cassier Type Pansy Mixture

The Cassier types are blotcher Pansies, showing three or five large blotches to the bloom, generally on light background. Very striking and attractive.  
Packet, 10c.

## Giant Pansy Mixture

Our Giant Mixed embraces all shades and a great many special strains of the largest and finest sorts known. There is no finer mixture of giant pansies offered by any one. For great size of blooms and beautiful types this mixture can not be surpassed.

Giants, mixed, Packet, 20c.

## Phlox Drummondii

Phlox Drummondii is one of the most brilliant of all annual flowers. Phlox continues to bloom long after most flowering plants are gone, making it a splendid bedding plant. It may be sown as early in spring as ground can be worked. Easily grown and always in bloom. No flower garden is complete without Phlox Drummond.

Finest mixed, all colors, Packet, 10c; 3 pkt. 25c.

## Poppies

Showy, large, brilliant colored flowers, growing freely in any garden soil. Produce a fine effect in clumps or beds.

Best Single Mixed, all colors, Packet, 10c.  
Best Double Mixed, all colors, Packet, 10c.

## Portulaca—Rose Moss

This plant will grow and bloom profusely in a dry, hot situation. The plants are of a dwarf spreading habit of growth, flowers of double sorts are like a small rose, and with its many brilliant colors. Portulaca makes a beautiful attraction.

Best Double Mixed, Packet, 10c.

## Ricinus or Castor Bean

Stately, strong growing plants with very ornamental foliage; well adapted as center plants for beds and give a garden a tropical appearance. The giant leaves often measure two to two and a half feet across. When planted singly or in masses the effect is matchless. Ricinus.

Packet, 10c; ounce, 20c.

Sweet Sultan

## Scabiosa—Morning Bride

Commonly known as the Pin Cushion Plant. The flower stems are long and blossoms keep well in water. When kept well picked will continue to bloom through the summer. Colors range white, yellow, flesh, scarlet, azure, red, crimson and rose.

Finest Strains, Mixed, Packet, 10c.

## Scarlet Runner Bean

A very hardy annual climber of the bean family; grows rapidly. foliage is quite dense; covered with brilliant scarlet flowers throughout the season. A splendid vine for porches and trellises.

Packet, 10c.

## Straw Flowers or Everlastings

Everlastings have become popular again; they retain all their natural color when dried and as the name indicates, are practically everlasting. When cut partly opened and dried they retain all their natural brightness all during the cold winter months. The drying is a very simple operation; they will dry thoroughly in about 10 days. Cut before fully expanded, tie in bunches and hang in a warm, dry room.

Finest mixed, containing all the best and popular shades, Packet, 10c.

## Sweet Sultan

Flowers in a way resemble Centaurea or Bachelor Button, but very much larger and finer. One of the hardiest and most beautiful annuals. Very hardy and easily grown. No flower garden is complete without this beautiful annual. Ranges in color from pure white through pink to purple.

Packet, 10c.

## Salvia or Scarlet Sage

A standard bedding plant that keeps the garden bright until late autumn. This plant lends itself to many uses such as borders, window boxes and pot plants. Foliage is dark green, flowers borne on long spikes of brightest scarlet, fine for brilliant color effect. Height two feet.

Bonfire, finest strain, Packet, 10c.

Our 10c Packages are larger. You get more for your money than on lower priced packages. That's what you want.

Salpiglossis

### Salpiglossis

Only nature can paint its wonderful colors. The blossoms are tubed shaped, much like a Petunia, but rivaling the latter in beautiful colors displayed. Each flower is vened with a glint of gold and is the only flower to our knowledge displaying this odd characteristic. Sow seed in open ground in Spring. Blooms in early summer and continues until frost. Try this once and you will always sow it.

Best special mixture, all colors and sorts, Packet, 10c; 3 Packets, 25c.

### STOCKS

The Stocks represent all the desirable qualities of a flower. The plants have good growing habits, fine dull glossy leaves. The flowers appear on long, stiff stalks like small rosettes; are exceedingly fragrant and range through a most complete scale of all the soft distinct shades, such as white, yellow, flesh pink, rose pink, crimson, light blue and dark blue. The spicy fragrance of Stocks perfume the whole garden and the abundance of beautiful bloom adds greatly to its attraction. If you haven't been growing Stocks start this year and we believe you will not again be without them.

### Dwarf German 10 Weeks Stocks

This is the earliest strain to come in bloom and while the plants are not so tall or flower stalks quite so long as Giant Perfection, they are very beautiful and desirable. We advise planting both varieties and you will have abundant bloom from early summer until freezing weather.

Dwarf German Finest Mixed, packet, 10c.

### Giant Perfection Stocks

Few flowers can compare with this strain of stocks. The plants are strong and vigorous, flowers large and produced in abundance. Continues in bloom until hard frost.

Finest Mixed, Packet, 10c.

### Verbenia

Very few plants will make such a gorgeous display during the summer months as Verbenias or

furnish more flowers for cutting. Sow seed in open ground in May. They begin flowering in July and are a riot of bloom until after frost. The brilliant colors range through pink, scarlet, purple, white and variations.

Finest mixed, all colors, Packet, 10c.

### SWEET PEAS

Perhaps no flower grown in this section gives greater satisfaction than the Sweet pea. Our soil and climate conditions seem to be ideal and Sweet Peas flourish here and reach their greatest perfection and beauty. Sow as early in spring as possible, the earlier the better. Soil should be very rich and peas planted deep, 4 to 5 inches; the ground should be well mulched with well rotted manure. Sweet Peas will bloom from spring until snow flies if properly handled.

Sow 1 ounce to 10 feet of row—must be sown thick to do well and look well.

### Sweet Peas—Special Mixture

This mixture is one of the best. We have handled this for years and it has given our customers the best of satisfaction. Contains all colors in right proportions and makes a beautiful display.

Packet, 10c; oz., 20c; ¼-lb., 50c.

### Sweet Peas—Prize Mixture

This is the best mixture obtainable. Consists of over 100 varieties of the largest flowering strains, including the daintiest colors of the Spencers. Many who have seen this mixture growing in past years pronounce it the finest display of Sweet Peas they had ever seen. Nothing in Sweet Peas could be finer. Sow our Prize Mixture and rest assured that no one will have anything finer in Sweet Peas.

Packet, 10c; oz., 30c; ¼-lb., 90c.

Sweet Peas

## Spencer Sweet Peas

### Named Varieties

We carry in stock many of the finest Spencer types in straight colors. Listed below is an assortment of the choicest varieties.

**Countess Spencer**—Large flowering, clear pink, deepening toward the edge. Packet, 15c; ½-oz., 20c; oz., 35c.

**King Edward VII**—The best pure red Spencer. Packet, 15c; ½-oz., 20c; oz., 35c.

**King White**—Gigantic flowers of pure white. Packet, 15c; ½-oz., 20c; oz., 35c.

**King Manuel**—Chocolate maroon. Packet, 15c; ½-oz., 20c; oz., 35c.

**Dobies Lavender**—Pure lavender. Packet, 15c; ½-oz., 20c; oz., 35c.

**Blue Jacket**—Navy blue. Packet, 15c; ½-oz., 20c; oz., 35c.

**Fiery Cross**—Intense orange scarlet. Packet, 15c; ½-oz., 20c; oz., 35c.

**Cream Spencer**—A real cream color, with immense fringed blossoms. Packet, 15c; ½-oz., 25c; oz., 40c.

**Dainty**—White ground with picotee edge of rose pink. Packet, 15c; ½-oz., 20c; oz., 35c.

**Blue Picotee**—White, edges violet. Packet, 15c; ½-oz., 20c; oz., 35c.

**Margaret Madison**—A beautiful azure blue. Packet, 15c; ½-oz., 20c; oz., 35c.

**Picture**—Flesh pink with creamy apricot. Packet 15c., ½-oz., 20c; oz., 35c.

**Torch**—Salmon rose. Packet, 15c; ½-oz., 25c; oz., 40c.

One packet each of above, 14 varieties, \$1.60.

Any five of above, your selection, 65c.

## Wild Cucumbers

A fine annual climber; makes a wonderfully rapid growth; a splendid vine where an abundance of shade is wanted quickly. Seeds should be planted

**Aquilegia or Columbine**

**Campanula or Canterbury Bell**

early and should be thoroughly soaked in very warm water 24 hours before planting.

Packet, 10c; oz., 30c.

## Zinnia

The Zinnia is prized for its brilliant colors, for the size and perfection of its flowers and for its sturdy growth. Sow seeds in open ground in May. Blooms from July until killed by frost. No flowers known will produce a finer showing than a bed of brilliant colored Zinnias.

Finest large flowering mixed, Packet, 10c; 3 Packets, 25c.

## Perennial Flower Seeds

### Bloom Second Year From Sowing

Sow perennials in beds or plots this season and transplant to permanent location during the summer and early fall. There is no better way to get a beautiful perennial flower garden than by growing your own plants from the seed.

### Aquilegia or Columbine

Charming, hardy plants, bearing in countless numbers through May and June exquisite, clear blue, white, rose, yellow, purple and striped blossoms. This is a hardy perennial blooming second year from seed. No garden should be without Columbine.

Special Mixed, very finest, packet, 10c.

### Anemone or Wind Flower

Very pleasing, hardy perennial plants for borders and beds. Fine, large flowers. Few plants compare with them in beauty. Fine for bouquets. Flowers shaped like a single poppy; all colors.

Finest Mixed, all colors of the choicest sorts, packet, 10c.

### Campanula or Canterbury Bell

Very ornamental perennials, growing about two feet high; producing large bell shaped flowers in long spikes, which make a glorious display when

planted in beds. Sow seed as soon as ground becomes warm. Blooms second year from sowing and will stand for years. Colors, purple, pink, white. Fancy special mixed, packet, 10c.

### Dianthus—Sweet William

A splendid old-fashioned plant, producing its large heads of beautiful colored sweet scented flowers in great abundance. Our special Dianthus mixed is sure to please. Contains all of the very finest strains. The unique colorings and shades of the flowers make a wonderful display. Plant this by all means. This is a perennial, blooming second year from seed.

Packet, 10c.

### Delphinium

(Perennial Larkspur)

The great aristocrat of the flower family. The regal beauty of the Delphinium is hardly equaled in any other flower. The remarkable development and improvement made in the various strains in recent years has brought this flower world-wide popularity. Our Gold Medal Hybrid strain is one of the finest. Grows two to five feet tall and produces immense spikes of flowers often two to three feet in length. Colors range the shades of blue, from delicate lavender to the deepest indigo. The flowers include both double and single types with dark and light centers. The Delphiniums are very hardy plants and will do well in any good rich soil. Gold Medal Hybrids—Packet, 20c, 2 for 35c.

### Double or English Daisy

Charming plants for edging and dwarf beds; blooming first year from seed. Thrive well in shady places.

Finest double mixed, Packet, 10c.

### Shasta Daisy

This is one of the creations of Mr. Luther Burbank. It is perfectly hardy, grows anywhere and blooms more abundantly each season. The flowers are very large, three to four inches in diameter when at their best; growing on long stems with two rows of broad, pure white petals and a yellow center. This flower is a perennial and will stand from year to year after once sown.

Alaska finest strain, Packet, 10c.

### Digitalis or Foxglove

Handsome, ornamental, hardy plants of stately growth. The seed, though small, germinates readily. Once planted they continue to grow and bloom from year to year. The flower spikes are often three to five feet long and covered with bell-shaped flowers in many colors, such as white, blue, yellow, pink, etc. Very striking and beautiful. By all means try this.

Special mixture, all colors, very finest, pkt., 10c.

### Gaillardia or Blanket Flower

They will produce from early spring until late fall a continuous profusion of brilliantly colored flowers, red and yellow predominating. Of easy culture. Sow where they are to remain, for they will come from year to year.

Finest mixed, packet, 10c.

### Hollyhocks

Perennial plants of stately growth, which will flower from seed the first year. The hollyhock is a hardy perennial and continues to grow and bloom from year to year after once sown. By all means sow Hollyhocks. They are showy, attractive and easily grown.

Best double mixed, packet, 10c.

Best double and single mixed, packet, 10c.

### Hibiscus

A splendid shrub-like plant very hardy and will do well in any good soil and most any location. The immense flowers are bell-shaped and measure four to five inches in diameter. Hibiscus blooms in August and September, the large, showy blooms well covering the plant. Colors range pink, cream

and white, some having pink and yellow centers. Best fancy mixed, packet, 10c.

### Lupinus

A fine perennial that is gaining a wide popularity in recent years. Lupinus should have a place in every flower garden. Splendid plants for borders and backgrounds. The foliage of the Lupinus is very attractive, producing large tufts of soft green foliage and the tall stately spikes of blooms are wonderfully effective. Colors range white, blue, pink, yellow and variegated.

Finest mixed, packet, 20c; 2 for 35c.

### Pentstemon (Beard Tongue)

Showy perennial plants, growing from two feet to four feet high; are rather bushy and have very long, slender spikes which bear many trumpet-shaped flowers with hairy throats from whence the name Beard Tongue comes. Large flowering, newest hybrids, splendid assortment of colors.

Packet, 20c.

### Pyrethrum—Painted Daisy

An unusually fine perennial of the daisy family. The daisy like flowers are very attractive and showy in the garden and with their long stems and good lasting qualities make a splendid cut flower.

Finest Hybrids, semi-double and single, mixed, packet 25c; 2 for 45c.

### Oriental Poppy

The single large Oriental Poppy is one of the most showy and striking of all the hardy perennial garden plants. The tall stems, three feet in height, bear great flowers of brilliant scarlet six or eight inches across. The plants thrive well in either sun or partial shade. The flowers are splendid for cutting, lasting well if cut as they are opening. Plants bloom in June. Perfectly hardy and easily grown from seed.

Packet, 10c.

### Violet

Hardy perennials, blooming freely throughout the season. These beautiful, sweet-scented flowers deserve a place in every garden.

Blue Perfection, a beautiful true blue strain, packet, 20c.

## Hudson Continuous Sprayer

The improved Hudson Critic Sprayer is constructed with a detachable tank for convenience in filling. Operates very effectively with all spray solutions. Has an adjustable nozzle which can be set to throw the exact type of spray wanted. Made of heavy tin. Capacity 1 qt. Working parts are brass and accessible for cleaning. Price, postage paid \$1.

## Hudson Misty Sprayer

The best selling qt.-size sprayer on the market. For a cheap and practical tin sprayer we have never seen its equal. Well made, works well and right in every way. Price, by mail, postage paid, 50c.

## Hudson Ideal Sprayer

If you could find a real all round Sprayer, that will do any job of spraying on the place, such as small orchards, vineyards, weeds, garden work, poultry houses, whitewashing, etc., and do it fully as well as the large power sprayers it would be mighty handy on the place wouldn't it? Every farm needs such a sprayer.

The Hudson Ideal Wheelbarrow Sprayer just fits your requirements. Read the description below and send us your order.

**Pump**—Made with seamless brass cylinder; 1 3/4 inches in diameter, 7 inches long; air chamber 30 inches, made of steel tubing.

**Tank**—Heavy galvanized steel or brass, reinforced top and bottom with heavy channel iron hoops, malleable castings for attaching to frame. Capacity, 15 gallons.

**Wheel**—20 inches in diameter, 2 1/2 inch tire, strong, light and rigid.

**Frame**—Heavy steel tubing with channels iron braces. Tank hung on trunnions.

**Discharge Equipment**—Six feet, 1 1/2-inch Hudson Spray Hose, 5 feet 1/4-inch iron pipe extension, Fog Nozzle and leakless shut-off.

**Air Tank**—Boiler iron, all joints welded, tested to 275 pounds pressure, 10-inch diameter, 24-inches long. Braced to frame with channel iron. Pressure gauge reading 200 pounds. Shipping weight, crated, 130 pounds.

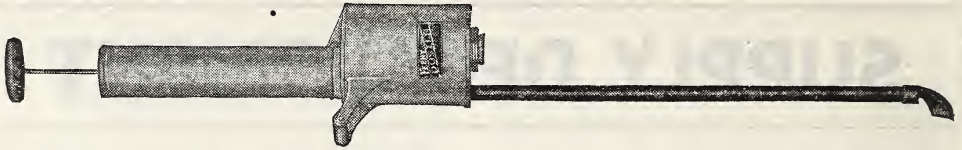

No. 33, Ideal, with galvanized Supply Tank, as illustrated. Price \$36.00 f. o. b. Twin Falls.

## Feeney Model BX Duster

For Dusting Dry Insecticides

The Feeney Model BX is the handy size for home and garden use. Ideal for applying insecticides to vegetable plants, flowers and shrubs. Saves material and does a much better job than can be done by old methods.

Price \$1.00, postage paid.

### Feeney Model D, 2-qt. Duster

This Duster is without doubt the best and most practical all round Duster made. Has long extension which enables the operator to dust underneath plants without stooping. Saves time, labor and material.

Price \$2.50, postage paid.

### Hand Corn Planters

Every farmer should have one of these handy corn planters; just the thing for planting small patches or for filling in the misses in your field.

Price by mail, \$1.75; postage paid.

## GARDEN TOOLS

Very Handy Around the Garden

### Trowels and Weeders

Very handy around the garden.

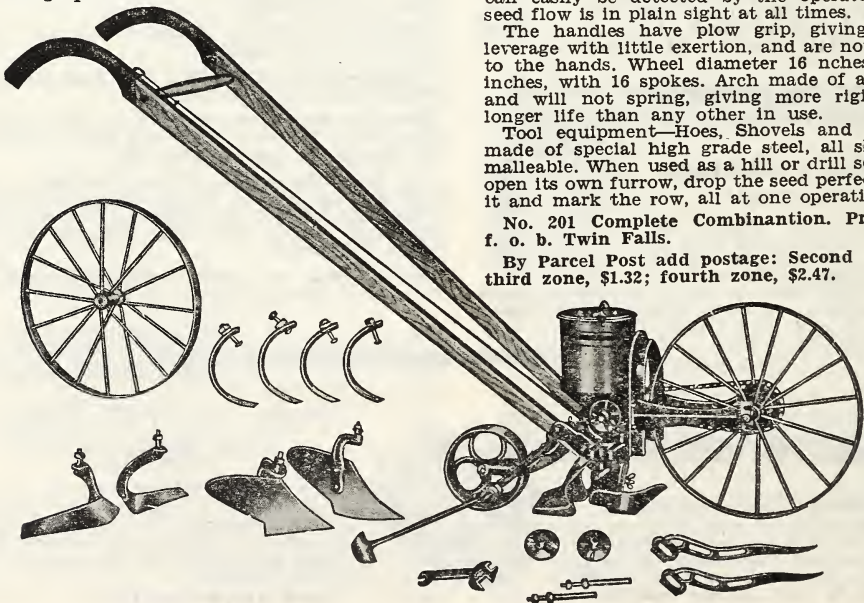

Made of one piece pressed steel handsomely finished in black enamel. Length of blades 6 inches. Ground and polished.

No. 80 Trowel—broad blades. Each 25c.

No. 81 Trowel—narrow blades for transplanting. Each 25c.

No. 82 Claw Type Weeder. Each 25c.

Postage paid.

### Moe's Three-Piece Garden Set

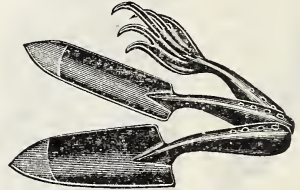

No. 83—Made up of one each No. 80, No. 81 and 82 as described above.

Price full set 65c, postage paid.

No. 82

No. 81

No. 80

### Moe's Hand Weeder

Here is one of the handiest little tools around gardens and plants. If you ever use one you'll find it hard to do without.

Price, 20c, postage paid.

### Hudson Combined Garden Tool No. 201

This is a combination tool quickly convertible into a double or single wheel hoe, hill and drill seeder, or double and single wheel cultivator. It will sow accurately anything from beans down to the smallest garden seeds in hills, 4, 6, 8, 12 or 24 inches apart, or in drills at any desired depth to two inches.

The brush force feed, constructed of selected bristles, is guaranteed not to injure the most delicate seeds and to feed all the seed from the hopper. By means of a thumb-screw the index is easily adjusted to feed the required amount of seed. Should the hopper run out of seed this can easily be detected by the operator, as the seed flow is in plain sight at all times.

The handles have plow grip, giving a great leverage with little exertion, and are not tiresome to the hands. Wheel diameter 16 inches, tire 1 3/4 inches, with 16 spokes. Arch made of angle steel and will not spring, giving more rigidity and longer life than any other in use.

Tool equipment—Hoes, Shovels and Plows are made of special high grade steel, all shanks are malleable. When used as a hill or drill seeder, will open its own furrow, drop the seed perfectly, cover it and mark the row, all at one operation.

No. 201 Complete Combination. Price \$16.00 f. o. b. Twin Falls.

By Parcel Post add postage: Second zone, 68c; third zone, \$1.32; fourth zone, \$2.47.

## Hudson Hill and Drill Seeder

(NO. 205 SINGLE WHEEL)

This seeder conforms in the main to the description given for No. 201. It is especially designed for the use of the market gardener who has enough work to warrant the purchase of a seeder only. However, at any time desired, the extra wheel and tools can be added, making a complete combination outfit, the same as our No. 201, as previously described.

No. 205: Price \$13.50 f. o. b. Twin Falls.

By Parcel Post add postage: Second zone, 61c; third zone, \$1.08; fourth zone, \$2.08.

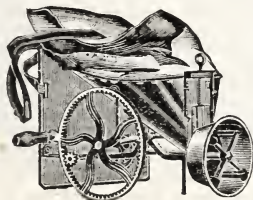

## GRASS SEEDERS

### Thompsons Royal Wheelbarrow Seeder

Save seed but increase your yield by this uniform seeding method. Does not throw seed in the air where wind can blow it into bunches and leave barren spots in your field.

The flow of seed is positively controlled and does not depend on the operator. Has a steel wheel and chain feed. Strong and durable, quickly adjusted for the quantity of seed desired. Sows equally and accurately. The hopper is 14 feet in length and will sow 30 to 40 acres per day. Sows close to the ground where wind does not affect it. The best seeder for sowing alfalfa, clovers and grass seeds. Shipping weight 60 lbs.

Price f. o. b. Twin Falls, \$16.00.

### Cahoon Broadcast Seeder

The Cahoon Broadcast Seeder is a compact, easily operated machine. It is used on some of the largest farms and ranches. The frame and handles are made of malleable iron which is tough and strong. The shafts are made from good quality steel and run true in their bearings. The gears are evenly cast and securely fastened to the shafts. Has a double gate, the larger for grain and the smaller, grass seed, with a guage which permits of setting the gate properly to sow a definite quantity per acre.

The Cahoon can be used for alfalfa, clover, grass seeds, barley, wheat, oats, rye, field peas, rape, sorghum, turnips and vetch.

Price: \$5.25, postage paid.

### Cyclone Grass Seeder

These little seeders are very handy around a farm; they sow light grasses and clovers very satisfactorily; on light grasses will do much better than the attachments on grain seeders. They will handle any kind of grain or seeds that require broadcasting. The price is low and every farmer should have one.

Price \$2.25, postage paid.

## GARDEN INSECTICIDES

### Hammond's Slug Shot

If any one should ask us to name the one best insecticide we would not hesitate to say Hammond's Slug Shot.

There is nothing better for destroying cabbage worms, flea beetles on cabbage, turnips, radishes, etc., or for any eating insects. Comes ready to use, just apply it and the work is done. Prices:

- 1 lb. can 30c.
- 5 lbs. bulk 90c.
- 10 lbs. bulk \$1.65.

Postage paid.

Order Hammond's Slug Shot with garden seed orders for protection.

Thompson's Royal Wheelbarrow Seeder

## Blackleaf 40

An old tried and proven insecticide for control of all soft bodied sucking insects, such as Aphis (Green Lice) on fruit trees, garden and flower plants, etc. YoYu must have a contact spray for such insects and Blackleaf 40 meets every requirement.

This is a liquid and cannot be mailed, must be sent Express or Truck.

Prices f. o. b. Twin Falls:

1 ounce, \$35c.  
5 ounces, \$1.00.  
1 pound, \$2.25.  
2 pounds, \$3.35.  
5 pounds \$6.25.  
10 pounds \$10.75.

EVER GREEN is the modern method in insect control—endorsed by professional and amateur horticulturists everywhere. It is absolutely non-poisonous to humans, animals or birds, yet deadly to most plant insects, both chewing and sucking varieties. Harmless to tender plants, pleasant to use—economical—easily applied—simply mix with soap suds and spray.

Give YOUR plants and flowers this new protection. Spray with EVER GREEN this season and see the difference in your garden. Don't wait until the insects have appeared—start using EVER GREEN early.

1 oz. bottle, 35c; 6 oz. bottle, \$1.00; 16 oz. bottle, \$2.00; 1 gal., \$11.50. Postage paid to 3rd zone.

## Semesan

Seed Disinfectant

Accelerates Seed Germination, Stimulates Plant Growth, Controls Seed Borne Diseases.

If you can find a simple, easy way to prevent decay, mold, eliminate plant borne diseases and at the same time increase germination and vitality—that's what you want to do isn't it? That would mean a better start on your crop and should mean more profits at harvest time.

Semesan—for Beans, Peas, Vegetables and Flower Seeds. Diseases carried on the seed often reduce germination and cause a poor stand, lowered quality and unsatisfactory yields. Destroy these disease organisms without injuring the seed by treating your seed, bulbs, roots, crowns and tubers with Semesan. Easily and quickly applied as a dust or liquid. Effective in controlling damp-

ing-off of seedlings and cuttings. Use Semesan to control seed-borne diseases and improve your vegetables and flowers. Write for Semesan booklet.

Prices: 2 oz., 50c; 1 lb., \$2.75; 5 lbs., \$13.00; 25 lbs., \$56.2.

At above prices we prepay express on 5 lbs., and 25 lb. cans. Smaller sizes will come by express collect. Semesan can not be sent by mail.

## NEW IMPROVED SEMESAN BEL

The Premier Dip For Seed Potatoes

Most Effective and Cheapest to Use

If you can find a dip that will give you better disease control, is easier to apply, and costs far less money—why shouldn't you use it?

Semesan Bel has been proven one of the most effective dips by years of use and has now been improved so that it goes much farther and costs less and gives even better disease control.

Treat your seed potatoes with best treatment at lowest cost. A pound of this new Semesan Bel treats 70 to 80 bushels of seed potatoes. Over 3 to 4 times more than the old.

Semesan Bel may be used on either whole or cut seed pieces. Prevent seed-borne disease losses by treating seed before planting with Semesan Bel, the instantaneous dip disinfectant. No titime consuming soaking necessary. Semesan Bel is effective in controlling such destructive seed-borne diseases as scab, rhizactinia and black leg. Protects the seed piece against rotting by soil-borne organisms. Improves germination and usually produces a bigger crop of better quality. One pound treats 70 to 80 bushels of seed. Write for Semesan Bel booklets.

Prices: 1 lb. tin, \$1.75; 5 lb. tin, \$8.00; 25 lb. tin, \$31.25.

Express paid on 5 lbs. or over. Cannot be sent by mail.

## CERESAN

A very effective dry dust treatment for grains—VVery economical to use. Not so caustic as common dry dust treatments—Not dangerous to handle and even more effective. Promotes Germination and Increases ViVality.

FOR SEED TREATMENT OF SMALL GRAINS

Ceresan has proven effective in controlling such seed-borne diseases as bunt or stitknig smut of wheat; stripe of barley; loose and covered smuts of barley and oats and covered kernel smut of sorghum. It is the only dust treatment which has successfully controlled these destructive germ diseases. Ceresan does not injure the seed nor the grain drill. Only 2 oz. of Ceresan required per bushel of wheat, rye or sorghum and 3 oz. for barley and oats. Easy to apply, economical to use.

Prices: 1 lb. tin, 75c; 5 lb. tin, \$3.00; 25 lb. pail, \$12.40.

Ceresan cannot be sent by mail. Freight or express prepaid on 5 lbs. or over.

You can sow Alfalfa straight without a nurse crop and cut two cuttings the first season.

**COPPER CARBONATE****Sherwin-Williams**

For treating wheat for the control of burnt or stinking wheat smut.

Metallic copper content 50 to 55%. Standard recommendation, 2 to 3 ounces per bushel, however, no harm will result if more is used. Copper carbonate causes no injury to germination, and is recognized in the largest wheat centers as the standard treatment.

Prices: f. o. b Twin Falls: 5 lbs., \$1.40; 10 lbs., \$2.50. Not mailable.

Write for prices in larger quantities.

### DISINFECTANT DEODORANT ANTISEPTIC

**For 145 Important Farm and Household Uses.**

For Disinfecting and Certain Poultry and Livestock Diseases

If you could find a disinfectant much stronger in germ killing power than all others, one that is non-poisonous and can be used internally or externally, one that is clean and can be used any place, anywhere for any and all disinfecting purposes, that destroys all odors leaving none of its own, that can be used for many diseases and infections to which others do not apply and costs no more—what would you say?

If BK will do all of those things you need it and want it—don't you?

B-K is no new cure-all, it's been on the market for more than 20 years, all of which time it has been growing in popularity until more of it is used for a wider variety of purposes than most any disinfectant on the market. No Farmer Can Afford to be Without B-K.

Following are a few of its uses:

Sterilizing dairy utensils—disinfecting poultry houses, coops, incubators and brooders, disinfecting cuts, sores and wounds—control and cure of white diarrhoea in chicks, roup, brooder pneumonia, cholera, etc.—calf scours, retaining after-birth—Sterilizing cisterns and purifying drinking water and dozens of other purposes.

It's safe to have B-K on the place.

# POULTRY SUPPLIES

## Moe's Large Capacity Chick Feeder

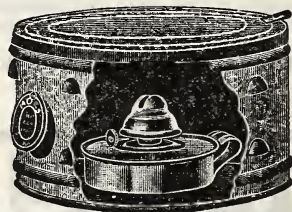

A wonderful feeder for young growing stock and a great time and labor saver when chicks are raised in large numbers. Made of heavy galvanized iron, sliding top cover, easy to fill and clean.

No. 140 Feeder, capacity 10 quarts, length 21 inches, 16 openings on each side.

Each \$1.20, postage prepaid.

No. 141 Feeder, capacity 17 quarts, length 35 inches, 27 openings on each side.

Each \$1.70, postage paid.

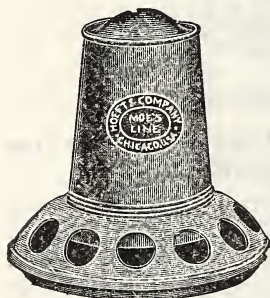

## Moe's Coal Oil Fountain Heater

Can be used with all styles of fountains and effectively prevents water from freezing. Effectively solves the problem of a uniform supply of fresh, clear water at all times, no matter how cold the weather.

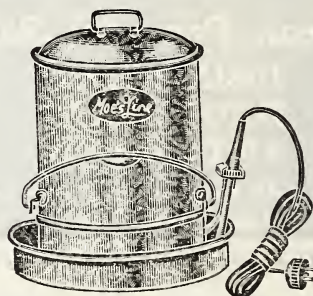

The lamp fount or bowl holds sufficient Kerosene to burn continuously for seven days. Simple and safe. Nothing can get out of order.

Price, \$2.00 each, postage paid.

## Moe's Adjustable Milk Feeder

Magazine feeder in tin. Plate adjustable up and down to feed slowly or rapidly, for any kind of milk or feed. Capacity about two quarts, has 12 feeder holes. No. 139 Magazine Tin Feeder. Each 75c; 1 doz., \$9; half dozen at dozen rate. Postage paid.

## Electric Fountain Heater

A very efficient Heating Unit for use in connection with Nos. 33 and 34 fountains, as described above. Connects with any ordinary light socket. Equipped with 6 feet of moisture proof cord. Keeps water at right temperature, prevents freezing, clean, economical to operate and safe, no danger in connection with its use.

If you can have a heater like this that solves the freezing problem so cheaply, economically and conveniently—why shouldn't you have it?

No. 433—Price \$3.00, postage paid.

## Tin Plate Butter Milk Feeder

These troughs are made of tin plate to resist milk acids. Sanitary and easy to clean.

No. 137—10 inches long, 10 holes. Price 30c.

No. 138—20 inches long, 20 holes. Price 40c.

Postage paid.

## Moe's Double Feed Troughs

For Chickens and Growing Stock

Made of best quality galvanized iron accurately stamped with dies. No sharp or rough edges to injure the chicks. Sliding top. Easy to clean, and fill.

No. 58—12 inches long, 18 holes, 30c; doz. \$3.50.

No. 60—24 inches long, 36 holes, 50c; doz. \$5.75.

No. 76—36 inches long, 54 holes, 70c; doz. \$8.00.

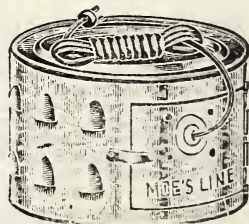

## Electric Fountain and Brooder Heater

Here is a winner—A fountain heater that can be used in connection with any ordinary fountain. Will prevent freezing and furnishes an ample supply of fresh water at the right temperature.

Equipped with a porcelain heating unit, guaranteed against moisture and weather conditions. Equipped with a rubber covered cord and soft rubber attachment plug.

Can be used as a heating unit for small brooders. How many times in the past have you wished for just such a brooder and fountain heater?

No. 436—Price \$4.00, postage paid.

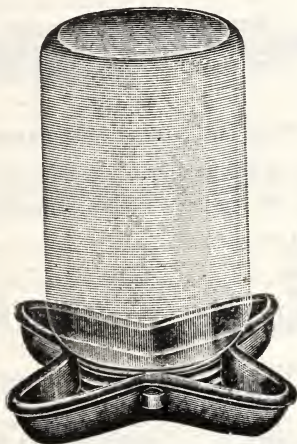

### Moe's Fill Top Fountain (Round Pan)

Fill in the morning and your chickens have an all-day's supply of pure water at just the right temperature. The double wall keeps the water cool in the summer and retards freezing in winter.

No. 33—Price: 2-gallon size, \$2.60, postage paid.  
No. 34—Price: 4-gallon size, \$3.10, postage paid.

### Moe's Star Jar Fountain and Feeder

The most simple, practical and durable Mason jar fountain on the market. Will fit any Mason jar. Convenient, cheap and sanitary. Little chicks can not get drowned. YoYu will need these when your chicks hatch, both for feed and water.

No. 133—Bright Tin Plate, each 10c; doz., \$1.20, postage paid.

### Moe's Mason Jar Fountain

Made of heavy tern plate—rust resisting. You'll need these for water when your chicks hatch.

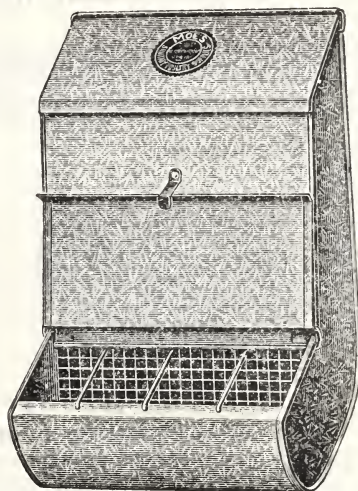

No. 142—Each 10c; doz., \$1.20; postage paid.

### Moe's Big Boy Feeder

A feeder especially designed for growing stock—three to four week old chicks and up to full grown mature fowl. Has a large capacity with wide, good sized feeder opening, the edges of which are rounded over perfectly smooth, so that large headed birds cannot injure their combs. Makes an excellent feeder for turkeys. Has a large capacity, holds about 75 pounds or 65 quarts of dry mash, with 17 openings on each side or a total of 34 openings. Can be placed on the ground, or on a low stand or suspended by the two wire handles. Shipping weight 16 pounds.

No. 160—Price: \$4.00, postage paid.

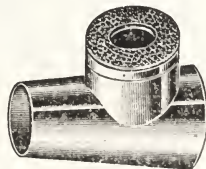

### Moe's Dry Mash Hopper

Large in capacity and small in price. Does away with all trouble of feed clogging no matter how coarse. A great feed saver. The manner of construction prevents birds from throwing out the feed. Manufactured of heavy galvanized iron.

Price by mail, postage paid to second zone:

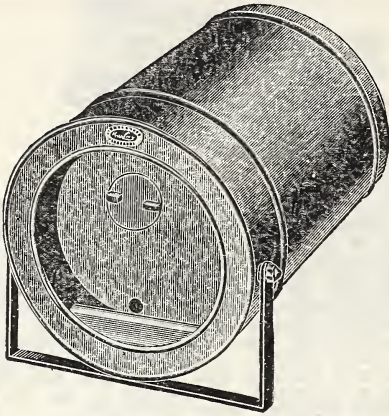

No. 35—10-quart size, \$1.50.  
No. 36—14-quart size, \$2.10.  
No. 19—22-quart size, \$2.40.  
No. 37—32-quart size, \$3.00.

### Moe's Egg Tester

To test fertility of eggs during the period of incubation. Used with an ordinary lamp No. 2 burner, in a dark room. It will illuminate the interior of the egg and show if the chick is alive, and also shows the size of air cell in the egg. Made in one size only.

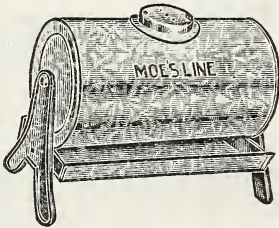

Price 25c, postage paid.

### Moe's Insulated Double Wall Fountain

Made of best quality galvanized iron, with double walls packed with an efficient insulating material to prevent water freezing. Easy to fill and easy to clean. An excellent winter fountain and equally good in summer to keep water fresh and cool.

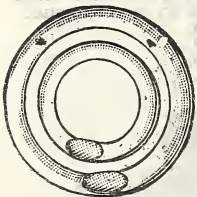

Price \$5.25, postage paid.

### Moe's Horizontal Swinging Fountain

A new type of fountain, with large capacity and ample drinking surface for large or small flocks. The water will flow automatically to the drinking pans as needed, and without spilling. The tank is held rigidly in position. Holds ten gallons, easy to fill and clean and will provide the flock with an ample supply of clear, fresh water.

Price \$4.75, postage paid.

### Key Ring Leg Bands

Made of celluloid. Makes the best and neatest poultry markers on the market. We have them in several different colors and sizes. When ordering state breed of chickens on which you intend to use them or whether you want them for baby chicks.

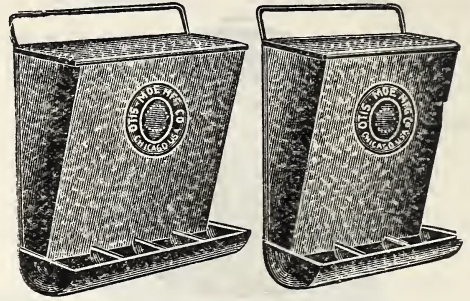

12 Bands .....	\$ .15
50 Bands .....	.35
100 Bands .....	.60
1000 Bands .....	5.00

Postage paid.

### Turkey Bells

Many of our customers will be glad to know where to get good turkey bells as they seem hard to obtain. We carry a very nice light, clear sounding bell with neck strap, just right for turkeys.

Price, 25c each, postage paid.

### Grit and Shell Boxes

These feed hoppers are made of strong galvanized iron and will last forever. They are very handy for feeding grit, shell, bone, charcoal, etc. Saves the feed, as it works down automatically with no waste. Made in 2, 3 and 4 compartments.

- 2-Compartment size, price 50c.
- 3-Compartment size, price 90c.
- 4-Compartment size, price \$1.20.

Postage paid.

### Leg Bands

#### MOE'S ALUMINUM LEG BANDS No. 130

Made of sheet aluminum, with large raised numbers, easy to read from a distance. Adjustable to any size fowl. Quickly applied—numbered from one up.

12 Bands .....	15c
25 Bands .....	25c
50 Bands .....	25c
100 Bands .....	70c

Postage paid in all cases. Order Leg Bands No. 130 to avoid mistakes.

### Moe's Poultry Punches

No. 38. Moe's Punch. A popular and practical punch for marking baby chicks. Punches a clean hole in the web between the toes and will not bruise the foot. Guaranteed to work perfectly. Price: 20c each, postage paid.

No. 39. Moe's Ideal Punch. A new improved punch, scissors type, works easily, cuts clean and does not pinch the foot. Convenient to carry in vest pocket. Nickel plated finish, 3 1/2 inches long.

Price by mail, 40c, postage paid.

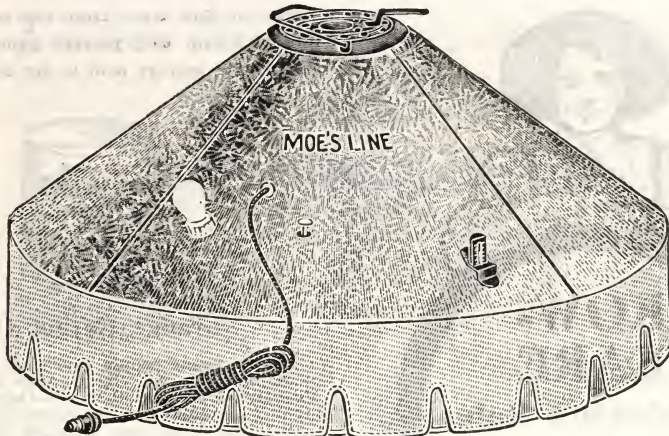

### Moe's Handled Scraper

Made of hard, stiff steel. Light in weight, yet strong and durable. The toothed or rake edge is excellent for cleaning sand or sifted ashes on drop boards. Length of blade, nine and a half inches; width, four inches; with 30-inch hardwood handle riveted to blade.

No. 51 Handled Scraper, each 50c, postage paid.

Moe's Electric Brooder

### Moe's Electric Brooders

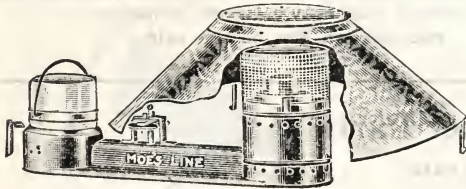

Highly Efficient, Clean and Economical  
These brooders operate from an ordinary light circuit. Gives an even, continuous heat properly distributed to insure comfort and health of chicks. Automatic heat control by dependable automatic thermostat. Can be set at desired temperature and automatically maintains that temperature. Substantial, strong and durable—East brooder comes fully equipped, ready to attach to an electric light socket. Comes in three sizes as follows:

No. 388—34 inch canopy, capacity 300 chicks—Price \$16.50.

No. 389—42 inch canopy, capacity 500 chicks—Price \$17.50.

No. 390—53 inch canopy, capacity 1000 chicks—Price \$20.00.

We do not stock these brooders but if ordered in reasonable time can soon fill your orders.

### Moe's Automatic Oil Brooder No. 227

Moe's Automatic Brooder uses kerosene as fuel and gives a steady, even warmth without fumes or gases. Has a new improved wickless blue flame burner. Oil reservoir holds one gallon of kerosene or coal oil and will run the brooder twenty-four hours or longer without refilling. The flow of oil is automatically regulated with thermostats to maintain an even heat.

A thoroughly reliable and efficient brooder which requires but little attention. Easily adjusted to any desired temperature.

No. 227—52-inch Canopy will accommodate up to 500 or 600 chicks. Price \$20.00 f. o. b. Twin Falls.

We do not stock these brooders but if ordered in reasonable time can soon fill your orders.

Cut operating expense and increase profits by sowing hay and pasture.

## POULTRY REMEDIES

### Revenge Lice Destroyer

For Poultry and Live Stock

It is with a great deal of satisfaction that we offer our trade REVENGE LICE DESTROYER. This is something different from the regular lines of lice extermination. It is non-poisonous and kills lice almost instantly, suffocates them and they drop off dead. It is very easy to apply on poultry or any kind of animal, cheaper and much more effective than oil on hogs. REVENGE LICE DESTROYER is the safest and most economical and effective for baby chicks, and you cannot afford to start the brooding season without it. Free sample on request.

Prices: 3 lb. cans, \$1.00; 6 lbs., \$1.75; 25 lb. pails, \$6.25. Postage paid in all cases.

### Blackleaf 40

For Lice and Mites on Poultry

The world's largest manufacturers of nicotine insecticides announce that "Black Leaf 40" painted on the top-side of the roosts will control body-lice. Saves the labor of handling each bird, either to dust, dip or grease. "Black Leaf 40" does not harm the birds nor retard egg production.

### MITES

In addition to controlling body-lice, "Black Leaf 40" is also effective when applied as a spray against poultry mites. Dilute "Black Leaf 40" at the rate of about one tablespoonful to one gallon of water (a dilution of 1 to 250), plus about ½ ounce of ordinary laundry soap. Dissolve the soap in hot water. Spray with good pressure over the roosts, walls, nests, dropping boards and other places in which the mites hide during the day.

### "BLACK LEAF 40"

10-lb. tin treats 1900 to 2400 running feet of roost .....	\$10.75
5-lb. tin treats 950 to 1200 running feet of roost .....	6.25

5-oz. package treats 60 to 75 running feet of roosts .....	1.00
1-oz. package treats 12 to 15 running feet of roosts .....	.35

All prices f. o. b. Twin Falls.

Blackleaf 40 cannot be sent by mail. Order by Truck or Express.

## KOW-KARE

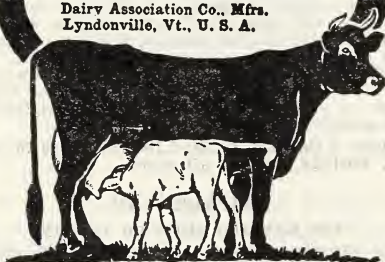

### Doubled her Value

That is the testimony of many a cheerful farmer who has tried Kow-Kare and knows its value as a remedy for all ailments peculiar to cows. If you have unprofitable

### BARREN COWS

give them Kow-Kare and double their value. Thousands of barren cows have become prolific breeders by the use of this preparation. Not a "food" but a medicine for cows only. Our book, "The Cost of a Lost Cow," sent FREE.

Dairy Association Co., Mfrs.  
Lyndonville, Vt., U. S. A.

Price of Kow Kare, large size can, \$1.25; medium size can, 65c; postage paid. 6—Large size cans, \$6.50; postage paid to 3rd zone.

### Grange Garget Cure

Made by same people who make Kow Kare. We recommend Grange Garget Cure for that serious disorder so peculiar to cows—Garget, or hardening of the udder—Inexperienced people often mistake it for caked bag, bunches in bag, etc. Remember it is a separate disease, with its own peculiarities, causes and remedy. Twenty-five years' use by dairymen and farmers proves the value and economy of using GRANGE GARGET CURE.

Price, per can, enough for 15 cases, 65c; postage paid.

### Bag Balm

Made by the Kow Kare people. We recommend BAG BALM for all diseases of udder and teats, Bunches, Chapping, Cuts, Inflammation, etc. It makes easy milkers of hard ones, keeps all the parts in a sanitary, healthful condition.

Price per can, 65c; postage paid.

## Are You Making Money on Calves?

We know some feeders who are saving \$10 to \$30 on every calf and raising better calves—husky, fast-growing youngsters that become real producers at the pail or as breeders.

### **Blatchford's Calf Meal**

grows better calves at lower cost. **FIRST** on the market. **FIRST** in quality. **FIRST** in results. One pound makes a gallon of rich milk substitute. Sell your milk—feed Blatchford's. It's guaranteed. A trial bag will convince you.

Blatchford's Calf Meal is the original Milk Substitute, it has been on the market and in general use for 132 years, and it's safe to say that more Blatchford's is used than of all other so-called calf meals combined. It's just got to be good to make a record like that—that's apparent isn't it?

If you can raise your calves cheaper and better with Blatchford's calf meal than by your present methods then you are paying for it anyway and why shouldn't you have it? Do not feed whole milk that is worth several times more than

Blatchford's Calf Meal costs you. Blatchford's and skim milk will produce just as good a calf and save you money and you can save a lot of skim milk for other animals and chickens. Try it and convince yourself.

Sold only in original bags of 100, 50 and 25 pounds.

Prices f. o. b. Twin Falls (100 lbs. \$5.00), (50 lbs. \$2.60), (25 lbs. \$1.40).

If wanted by mail add postage at rate specified in Parcel Post Instructions No. 2 in front of catalog.

## **Blatchford's Chick Mash**

### **Should be Every Chick's First Feed**

**BLATCHFORD'S** Milk Mash is the favored starting and growing feed of the most prominent poultry-raisers in the country. It contains all the feeds and nutriment chicks need *right from the start*. It shields them from white diarrhea, bowel trouble and leg weakness.

2 1/4 lbs. at 8 weeks!  
Trade-mark  
Reg. U. S. Pat. Off.

This mash is neither a tonic nor a medicine but a nutritious, wholesome, palatable body-builder. It promotes health, vitality and growth by building up sturdy, disease-resistant frames.

It does not force, but, by supplying proper nourishment to each and every part of the body, it promotes steady and complete development in the shortest possible time.

**Blatchford's Chick Mash** contains no screenings, hulls or cheap by-products from the manufacture of breakfast foods, cereal foods or scratch grains. It carries chicks *all the way*—starts, grows and matures—*without change of feed*.

Blatchford's Chick Mash is the most economical feed you can use to start your chicks and why? It has the highest feeding value of any feed on the market, therefore, it does not require as much to nourish the chicks, it goes farther. It brings your chicks to quicker maturity and earlier production, and that's what you are working for. Being a perfect balanced ration, it promotes health, vitality and growth, and you have less chick losses, it's safe.

If Blatchford's Chick Mash will do all these

things for you, you are paying for it any way, that's apparent. If you are paying for the best why shouldn't you feed Blatchford's? It's equally good for turkeys, too.

Made by the Oldest and Best Known feed mixing house in America.

Prices Blatchford's Chick Mash (100 lb. bags \$4.20), (25 lb. bags \$1.15) f. o. b. Twin Falls.

If wanted by mail add postage as specified in Parcel Post Instructions No. 2 in front of catalog.

This is the year to sow hay and pastures. In 25 years' experience we have never been able to offer Grass Seeds so low

## MAIL DELIVERY

It is very often more convenient and sometimes cheaper to have your orders come by mail than any other way. No matter how large the order it can be shipped that way. If you want mail delivery, read Parcel Post Instructions No. 2 on back cover page of this catalog and add postage to your order accordingly.

THIS IS THE YEAR TO SOW GRASS SEED

## What to Plant?

That question is being asked us every day and we would like to answer it in a way that would bring you profit and happiness. But unfortunately, it's not within the power of any man to foretell the future at any time to any degree of certainty. If we could do that we would be rich, and we're not rich.

If we can't foretell the future, we can at least, observe the past and try to profit from the success or failure of its record. That is all the past appears to be good for, but it should be worth a lot for that. By the past we don't mean any short period of inflation or depression years but the long pull, lifetime past. What are its lessons, can we and will we learn them?

The records of the past appear to have demonstrated certain fundamental facts and rules relating to agriculture that cannot be disregarded without danger of loss and disaster. Soil fertility must be increased, if possible, or maintained at all cost. The average farm must be operated in a way to produce a sure income, be it great or small. It must be a well balanced unit, not dependant on any one crop for total income. It should be diversified in crops, but not to an extent to increase operating expenses beyond reasonable bounds, and the main crops should be safe standard crops and not of a perishable nature. Also, the past appears to demonstrate plainly that agriculture is no "get rich quick" or speculative venture, but a conservative, practical and fairly safe "way of life," equal to or better than most occupations in assurance of a home and comfortable safe living conditions.

It further appears to demonstrate that those sections that place their dependence on livestock, farming or balance their farms with livestock and cash crops always fare better in times of stress. The farmer with a lot of good livestock on the place has accumulated assets which the exclusive crop seller lacks at the time when most needed.

Figure it out for yourself, but keep the fundamental facts in mind while you are figuring. Map out a course, that for the long pull, appears to you to be the way that will get you where you want to be.

To us there appears to be a great shortage of pasture, hay and livestock on most of our Idaho farms and we believe that most farmers can improve their economic condition, permanently, by devoting more of their land to hay and pasture and accumulating more good livestock.

If you can find a way to increase the fertility of your land, insure a steady income, balance your farm and reduce operating expenses—that's what you need and want, isn't it?. It's up to you to figure it out for yourself.

If this appeals to you, then remember that feed, hay and pasture come first. Start now and get there sooner. All hay and pasture plant seeds are now selling lower than in twenty-five years.

This is the year to sow grass and hay.

IN  
SECOND ZONE

### NOTE ZONE STAMPED ON YOUR CATALOG

Before sending in your order for Field and Grass Seeds or other goods, (except garden seeds) please note whether they are priced postage paid or F. O. B. Twin Falls and add postage if required, as specified in Parcel Post Instructions as outlined below.

All Garden and Flower Seeds are priced Postage Paid. Do not add anything for postage.

Grass and Field Seeds in Small Quantities are priced Postage Paid to 2nd Zone—You must add postage as specified in Parcel Post Instructions No. 1 if you are outside the 2nd zone.

Grass and Field Seeds in Large Quantities, as quoted in our large quantity list, are all priced f. o. b. Twin Falls. You pay all transportation charges when ordering from this list. If you want us to ship by Parcel Post please add postage as specified in Parcel Post Instructions No. 2.

Feeds, Insecticides, and Supplies in some cases are priced postage paid and in others f. o. b. Twin Falls. In all cases where goods are priced f. o. b. Twin Falls add postage as specified in Parcel Post Instructions No. 2.

### Parcel Post Instructions No. 1

Covering Goods priced postage paid to 2nd zone only, such as Grasses, Field Seeds in small quantities and certain other goods listed. If you are located beyond the 2nd zone, add to your order to cover extra postage as follows:

- 2nd Zone to 3rd Zone, 1c per lb.
- 2nd Zone to 4th Zone, 3c per lb.
- 2nd Zone to 5th Zone, 5c per lb.

YOUR ZONE IS STAMPED ON YOUR CATALOG.

### Parcel Post Instructions No. 2

Covering all goods priced in large quantities on Grass and Field Seed price list and all other goods priced f. o. b. Twin Falls. When ordering goods priced f. o. b. Twin Falls, you pay all transportation charges. In many cases you can save time and money by having your orders come by mail. When ordering by mail postage must be added to orders as follows:

- 1st Zone—7c for first pound, 1c per pound for each additional pound.
- 2nd Zone—7c for first pound, 1c per pound for each additional pound.
- 3rd Zone—8c for first pound, 2c per pound for each additional pound.
- 4th Zone—9c for first pound, 4c per pound for each additional pound.

YOUR ZONE IS STAMPED ON YOUR CATALOG.

We can ship up to 70 lbs. in one package and as many packages of 70 lbs. or less as required to complete your order.

### How to Make Out Your Order

Fill out the order sheet enclosed herewith, writing or printing your name and address very plainly.

### SEND CASH ALONG WITH ORDER

Remittances may be made by Postoffice or Express Money Order, Draft, Stamps or Currency. We prefer that you do not send stamps for amounts over 50c. Be sure to register your letters if they contain cash. Money orders are the safest, most economical and practical way of remitting.

Before Sending our Order, Read Parcel Post Instructions and Note Whether Prices Quoted Include Postage, if not add postage as may be required. If prices are quoted f. o. b. Twin Falls, use Parcel Post Instructions No. 2.
